## CHAPTER I

### INTRODUCTION

## 1. Background

### a) A Review of Previous Reports on Park Use Statistics

In the past, statistics on the use of Canada's National Parks have been presented in the Statistical Reference. In 1968, 1969 and 1970, a Reference containing data on National Park campgrounds was produced. In 1971, 1972 and 1973-74, the Statistical Reference was expanded to include data on gates, interpretive facilities and services, and visitor services (including campgrounds).

Since 1969, histograms and analysis sheets have been used to present data in the Reference. Histograms are graphs showing the amount of use recorded for each day of the operating season. Analysis sheets, which are in tabular form, are based on the same data as the histograms. They have changed in content with each succeeding Reference as information needs became more clearly defined. The analysis sheets in the 1973-74 Statistical Reference contain data such as use of gate, facility or service by month, use by type of day and a comparison between 1973 and 1974 use statistics. The Statistical References of 1971, 1972 and 1973-74 also include information describing a selection of special studies which were conducted by, or under the auspices of, Parks Canada.

### b) Reference Material: 1973-74 Statistical Reference

Special mention should be made of the 1973-74 Statistical Reference. Chapter I of each volume of the 1973-74 Statistical Reference is devoted to an assessment of the data collection and reporting procedures for National Parks, National Historic Parks and Sites and ARC (Agreements for Recreation and Conservation). Also included in Chapter I is a selection of definitions which are vital to the understanding of park use statistics. It is intended that this chapter be used, on a continuous basis, as reference on the data collection and reporting system. Therefore, little background information is provided in this report. The reader unfamiliar with the data collection and reporting procedures is advised to consult the 1973-74 Statistical Reference.

The 1973-74 Statistical Reference also contains trend data. In Chapter V of each volume, statistics on the use of regular campgrounds for the years 1968 to 1974 and statistics on group campgrounds for the years 1972 to 1974 are provided. National Park and National Historic Park and Site attendance is presented for the fiscal years 1950/51 to 1974/75.

## 2. National Parks: 1975 Park Use Statistics

### a) New Format

The title of this report, National Parks: 1975 Park Use Statistics, indicates that data for National Historic Parks and Sites are not presented here. In the new format, use data for National Parks are

displayed in tables which summarize use of gates, facilities and services for the months of April to September. In previous References, data were presented for October as well. However, it was felt that eliminating this month would accelerate publication of this report.

Histograms have been eliminated from the report. However, the capability to produce them has been retained and requests for individual histograms can be sent to the Socio-Economic Research Division (SERD) in Ottawa. It will take approximately two to three weeks from receipt of the request to produce a histogram, longer for a large number of histograms.

The decision to develop a new format was based on several factors as explained below:

- (i) The ever-increasing amount of data makes it impractical to continue on a course which will result in volumes of data so immense that the reader will have difficulty in locating that particular item of information which is of interest to him.
- (ii) In a report commissioned by Parks Canada, entitled Park Use Statistics Collected by Parks Canada: Status and Recommendations,<sup>1</sup> the recommendation was made that the Statistical Reference, in its present format, be discontinued. The results of this study and other feedback which SERD has received from Reference-users indicates that the high cost of producing the kind of data which appeared in previous References (especially the histograms) is not justified by the amount of use which is made of the data.
- (iii) The new format will enable SERD staff to produce a report on park use statistics in a shorter time than has been the case in the past. In line with this goal, a further reduction in the amount of detail included in the tables is planned for future reports. It is intended that eventually the report will appear in the December following the summer season. In this way, statistics will be available when the most use can be made of them, e.g. in the preparation of budgets.

---

<sup>1</sup>

Park Use Statistics Collected by Parks Canada: Status and Recommendations, prepared for Parks Canada by Balmer, Crapo and Associates Inc.

b) Organization of Data

In this report, use data for gates, facilities and services are grouped in the following manner: Chapter II contains campground data; in Chapter 3 are data on recreational facilities and services excluding campgrounds; Chapter IV contains data on traffic entering monitored gates, summarized for each park. Background information and description of the tables in which use data are displayed appear at the beginning of Chapters II through IV.

A special note is needed on the manner in which park facilities and services are classified. This classification is changing and will continue to change, in keeping with the increased flexibility provided by the new data processing system. It is expected that this new system will be operating for the 1976/77 fiscal year. The classification over time is shown in the following chart:

| CLASSIFICATION IN<br>PREVIOUS REPORTS             | CLASSIFICATION<br>IN 1975 REPORT                         | PROPOSED CLASSIFICATION<br>FOR FUTURE REPORTS                         |
|---|--|---|
| 1. gates  | 1. gates   | 1. gates  |
| 2. campgrounds                                    | 2. campgrounds   | 2. visitor services<br>a) campgrounds<br>b) other visitor<br>services |
| 3. interpretive<br>facilities and<br>services     | 3. facilities and<br>services (excluding<br>campgrounds) | 3. interpretive facili-<br>ties and services                          |
| 4. non-interpretive<br>facilities and<br>services |  |   |

The present data processing system does not allow for organization of the data as shown in the proposed classification for future reports. Gate and campground data appear in separate sections and interpretive and visitor services (excluding campgrounds) data appear in the same table. It should be noted that the individual facilities and services are not presented in alphabetical order within each table. This too will be changed with the introduction of the new data processing system.

c) Location of Reference Maps

Since the data presented in this report for each component are grouped by region, a map has been provided on the page opposite showing the area encompassed by these regions. As well, at the beginning of each set of campground tables for a region, there is a map of Canada with that particular region shaded in. And finally, a map of the region showing the location of the National Parks appears at the beginning of each set of facility and service tables for a region.

d) Requests for Comments

Because a new format for presenting park use statistics has been developed for this volume, the Socio-Economic Research Division would appreciate receiving comments from readers concerning the usefulness of this format. Specifically, SERD would like to know whether the information presented in this volume is useful to the reader. Should the reader feel that figures other than, or in addition to, those provided here would be of greater use, it is requested that suggestions for change be forwarded to SERD.

## CHAPTER II

### USE OF NATIONAL PARK CAMPGROUNDS

## CHAPTER II USE OF NATIONAL PARK CAMPGROUNDS

The data on National Park campgrounds are contained in four separate tables. Tables 1 to 3 show campground use statistics for campgrounds with individual campsites. Statistics on group campgrounds are presented in Table 4.

Campground data are ordered as follows: the first breakdown is by region, with Atlantic Region data appearing first, then Quebec Region data, and so on, ending with the Western Region; within each region the data is organized by park, in alphabetical order; within each park individual campground data are ordered according to the numerical code assigned by Parks Canada.

It would be preferable to have the campgrounds ordered alphabetically, since this would aid the reader in locating data on a particular campground. However, as was stated in Chapter I, this difficulty will be rectified with the implementation of the new data processing system in the 1976/77 fiscal year.

All of the tables which present data on campground use are set up in the following manner: (i) the table number and title is centered at the top of the page; (ii) the name of the park appears in the upper left-hand corner of the table; (iii) where meaningful, the statistics for each park are totalled and these totals appear at the end of each set of campground statistics for a park.

The statistics which appear in each of the campground tables are briefly described in the following section.

TABLE 1 - NATIONAL PARK CAMPGROUNDS: SUMMARY OF USE APRIL 1 TO SEPTEMBER 30

1. Number of Nights Open\*: number of nights each month during which the campground was open to the public for the months of April to September and the total for all these months. 1974 and 1975 figures are provided for comparison purposes.
2. Number of Party-Nights: number of parties staying overnight in campsites in park campgrounds for the individual months of April to September and the total for these months. 1974 and 1975 figures are provided.
3. Variation in the Number of Party-Nights 1974-75: the difference in the number of parties staying overnight in campsites in park campgrounds between 1974 and 1975 in number (DIFF) and percent (% CHANGE) for the individual months of April to September and the total difference over those months.

---

\*park total not provided for this statistic

TABLE 2 - NATIONAL PARK CAMPGROUNDS: OCCUPANCY INFORMATION APRIL 1 TO SEPTEMBER 30, 1975

1. Percentage of Campsites Occupied: percentage of campsites in park campgrounds which were occupied on weekdays and weekend days during the individual months of April to September 1975 and the total for those months.
2. Number of Nights at or over 90% Capacity: number of nights in 1975 during which 90% or more of the campsites in park campgrounds were occupied on weekdays and weekend days for the individual months of April to September and the total for those months.
3. Number of Nights Open\*: number of nights in 1975 during which the campground was open to the public for the individual months of April to September and the total for those months.

TABLE 3 - NATIONAL PARK CAMPGROUNDS: PERCENTAGE CHANGE IN USE 1974 COMPARED TO 1975

1. Percentage Change in Use: change in numbers of parties staying overnight in campsites in park campgrounds on weekdays and weekend days between 1974 and 1975 for the individual months of April to September and the total for those months.

TABLE 4 - NATIONAL PARK GROUP CAMPGROUNDS: SUMMARY OF USE APRIL 1 TO SEPTEMBER 30

1. Number of Nights Open\*: number of nights in 1974 and 1975 during which a group campground was open to the public for the individual months of April to September and the total for those months.
2. Number of Person-Nights: number of persons staying overnight in a group campground in 1974 and 1975 for the individual months of April to September and the total for those months.
3. Variation in the Number of Person-Nights 1974-1975: the difference in the number of persons staying overnight in a group campground between 1974 and 1975 in number (DIFF) and percent (% CHANGE) for the individual months of April to September and the total difference over those months.

---

\*park total not provided for this statistic

NOTE: Some facilities and services for which use data have been supplied in the past, do not appear in this report. In many cases, a park did not submit the data to SERD in sufficient time to allow them to be included in this report.

CHAPTER III

USE OF  
NATIONAL PARK FACILITIES  
AND SERVICES\*

---

\*Excluding Campgrounds

CHAPTER III USE OF NATIONAL PARK FACILITIES AND SERVICES  
(EXCLUDING CAMPGROUNDS)

The data in this chapter cover both interpretive facilities and services and visitor services (excluding campgrounds). These two classes of facilities and services are intermingled in the organization of facility data within Table 5. As was pointed out in Chapter I, the proposed classification of park facilities and services will allow for separate sections for interpretive and visitor services data in future reports.

The ordering of the data in Table 5 is similar to that used for campgrounds: the table is broken down by region, park and then individual facilities. A description of the statistics in Table 5 appears in the following section.

TABLE 5 - NATIONAL PARK FACILITIES AND SERVICES: SUMMARY OF USE  
APRIL 1 TO SEPTEMBER 30

Number of Days in Operation\*: number of days in 1974 and 1975 during which the facility or service was open to the public for the individual months of April to September and the total for those months.

Use: number of persons, parties, boats making use of the facility or service in 1974 and 1975 for the individual months of April to September and the total for those months.

Variation in the Amount of Use 1974-1975: the difference in number of persons, parties or boats using the facility or service between 1974 and 1975 in number (DIFF) and percent (% CHANGE) for the individual months of April to September and the total difference over those months.

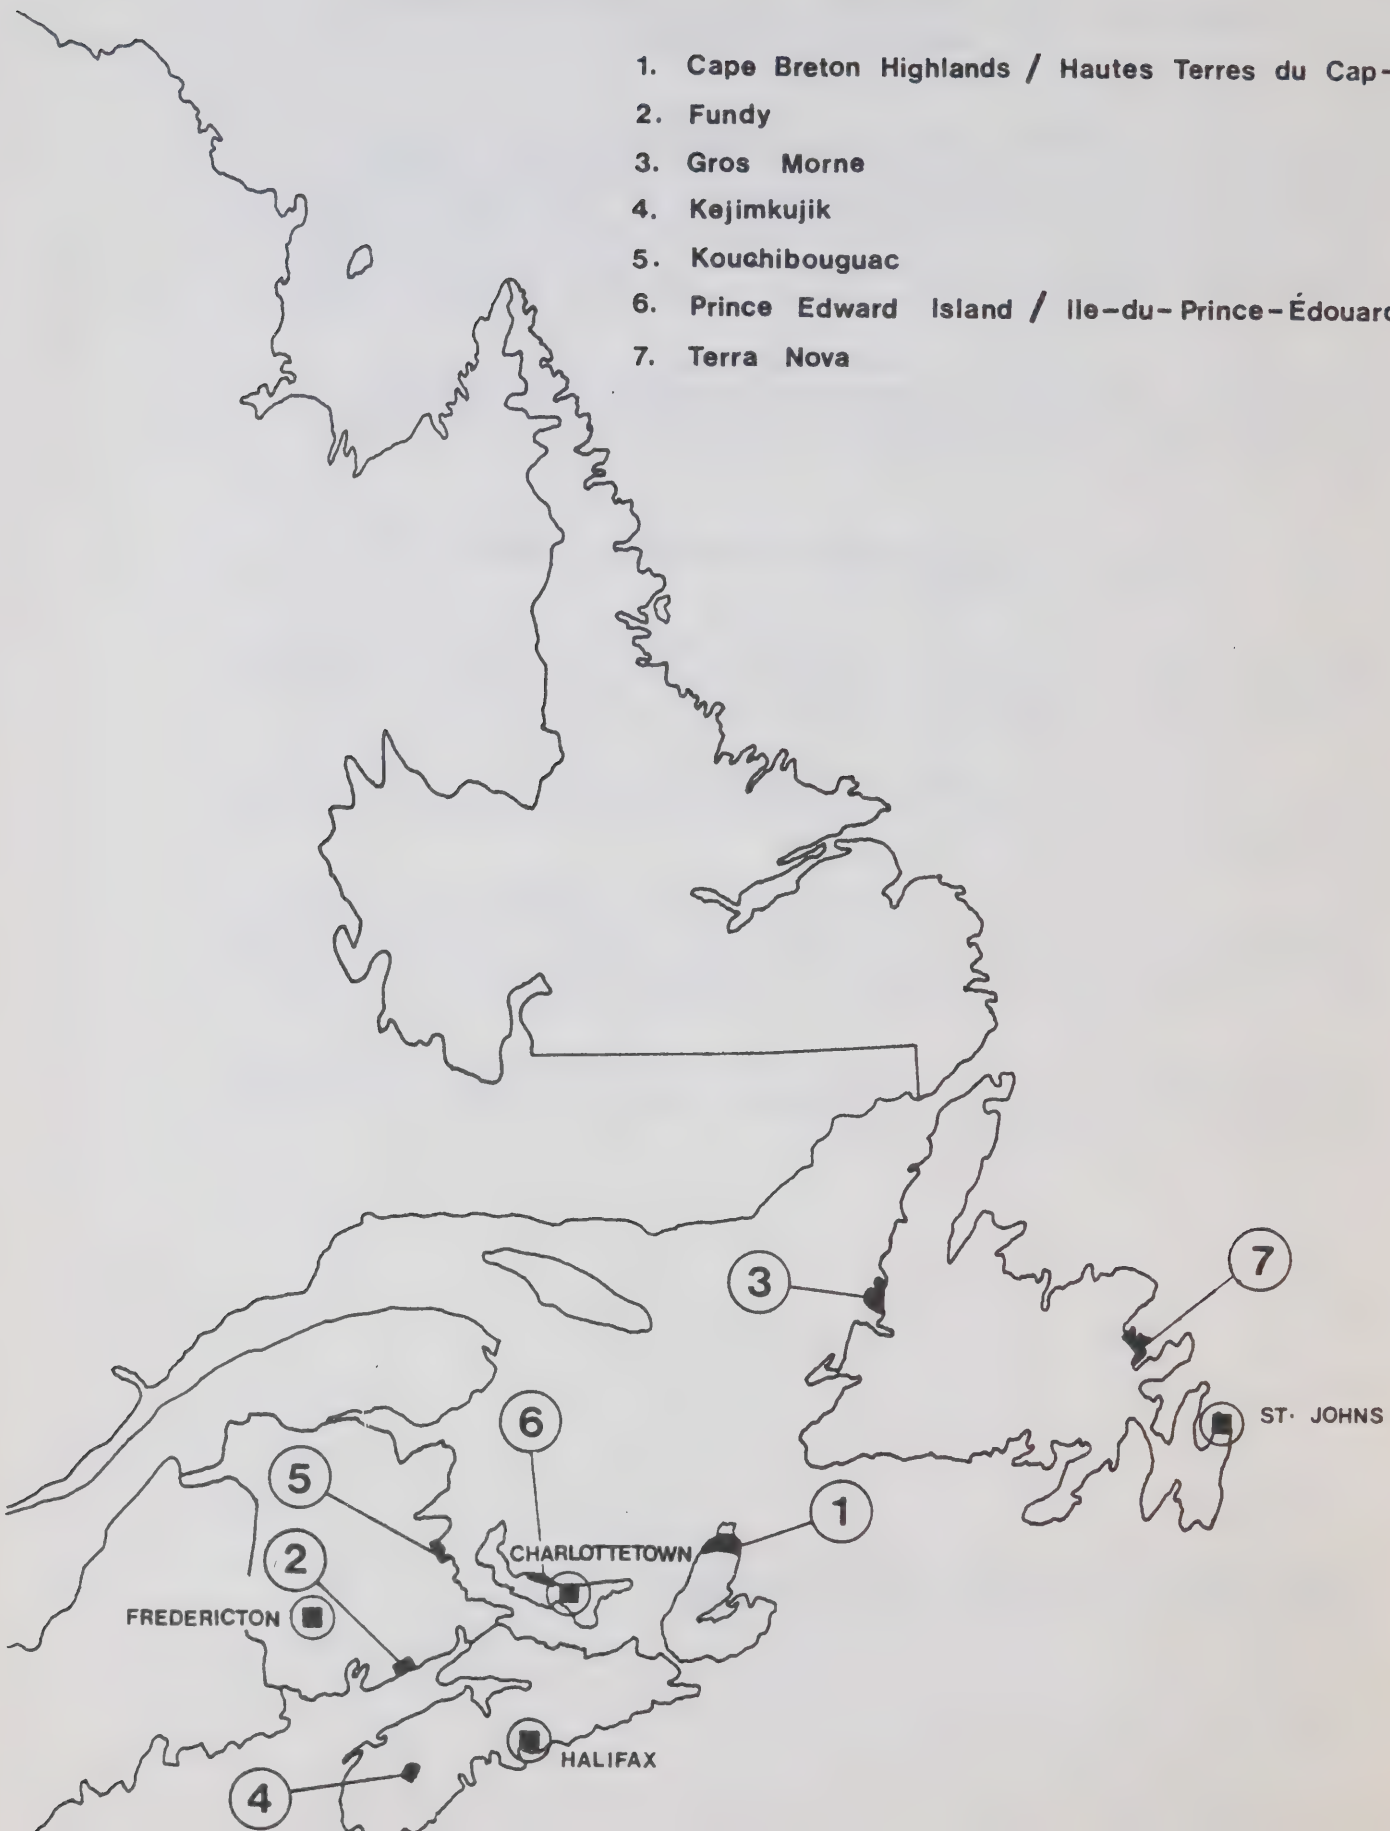

Unit of Measure: the unit in which the count or estimate of amount of use was made. The unit could be persons, parties or boats depending on the individual facility or service.

## CHAPTER IV

### NATIONAL PARK GATE COUNTS

#### CHAPTER IV NATIONAL PARK GATE COUNTS

Data collected at National Park gates are presented by park total only. It is important to note that the statistic "number of vehicles" refers to all types of vehicular traffic entering a park, e.g. commercial, pass through, visitor.

As with the other tables in this volume, Table 6 presents the use statistic for the individual months of April to September and the total for those months. The unit of count is always number of vehicles, except for St. Lawrence Islands National Park in Ontario Region which reports use in number of persons.

For those readers who are interested in knowing the individual gates from which the data were obtained, a section has been provided at the end of this chapter. In this section the gates which reported data are listed in alphabetical order for each park.

TABLE 6  
SUMMARY OF VOLUME OF TRAFFIC ENTERING NATIONAL PARKS  
APRIL 1 TO SEPTEMBER 30, 1975

| PARK           | MONTH     | NUMBER OF VEHICLES |                |

GATES FROM WHICH DATA WERE OBTAINED

ATLANTIC REGION

Cape Breton Highlands

- (i) East Gate - Cabot Trail (Ingonish)
- (ii) West Gate - Cabot Trail (Cheticamp)

Fundy

- (i) East Gate - Hwy 114 (Alma)
- (ii) North Gate - Hwy 114 (Lakeview)

Kejimikujik

- (i) Main Gate - Hwy 8

Kouchibouguac

- (i) Frigot Road
- (ii) Route 117 N. (Village de Kouchibouguac)

Prince Edward Island

- (i) Campore Lane (Park Gate)

Terra Nova

- (i) North Gate - Trans-Canada Highway
- (ii) South Gate - Trans-Canada Highway

QUEBEC REGION

Forillon

- (i) Cap-Des-Rosiers-est Gate
- (ii) Penouille-Peninsula Gate
- (iii) Petit Gaspé Gate

La Mauricie

- (i) Lake Parker Gate
- (ii) St. Mathieu Gate

ONTARIO REGION

Point Pelee

- (i) Main Gate

St. Lawrence Islands

- (ii) Mallorytown Landing (Day Use Area)

PRAIRIE REGION

Prince Albert

- (i) East Gate - Highway 264
- (ii) South Gate - Highway 263

Riding Mountain

- (i) East Gate - Highway 19
- (ii) North Gate - Highway 10
- (iii) South Gate - Highway 10

WESTERN REGION

Banff

- (i) East Gate - Trans-Canada Highway
- (ii) Saskatchewan River Crossing Gate

Elk Island

- (i) North Gate - Road to Lamont
- (ii) South Gate - Highway 16
- (iii) West Gate - Road to Fort Saskatchewan

Glacier

- (i) East Gate - Trans-Canada Highway

Jasper

- (i) East Gate - Highway 16
- (ii) South Gate - Columbia Icefields Parkway
- (iii) West Gate - Highway 16

Kootenay

- (i) West Gate - Highway 95

Mount Revelstoke

- (i) West Gate - Trans-Canada Highway

Pacific Rim

- (i) Traffic Counter No. 2 Ucluelet to Tofino

Waterton Lakes

- (i) Main Gate - Highway 6 North

Yoho

- (i) Boulder Creek Compound

LA REGION DES PRAIRIES

Prince-Albert (1) Entrée est - route no 264 (11) Entrée sud - route no 263

Mont Ridding (1) Entrée est - route no 19 (11) Entrée nord - route no 10 (111) Entrée sud - route no 10

LA REGION DE L'OUEST

Banff (1) Entrée est - Transcanadienne (11) Accès passage de la rivière Saskatchewan

Elk Island (1) Entrée nord - route de Lamont (11) Entrée sud - route no 16 (111) Entrée ouest - route du fort Saskatchewan

Glacier (1) Entrée est - Transcanadienne

Jasper (1) Entrée est - route no 16 (11) Entrée sud - route des champs de glace Columbia (111) Entrée ouest - route no 16

Kootenay (1) Entrée ouest - route no 95

Mont Revelstoke (1) Entrée ouest - Transcanadienne

Pacific Rim (1) Poste de contrôle no 2 route d'Ucluelet à Tofino

Lacs Waterton (1) Entrée principale - route no 6 nord

Yoho (1) Entrée centre du ruisseau Boulder (11) Entrée ouest - Transcanadienne

\* SEMAINE: DU LUNDI AU JEUDI, INCLUSIVEMENT  
# WEEKEND: VENDREDI, SAMEDI, DIMANCHE ET JOURS FERIÉS  
\$ L'UNITÉ DE MESURE, POUR CE PARC, EST LE NOMBRE DE PERSONNES,  
NON LE NOMBRE DE VEHICULES

Les données recueillies aux entrées des parcs nationaux ne sont présentées que par total pour le parc. Il est important de noter que le "nombre de véhicules" englobe tout genre de trafic automobile entrant dans un parc, par ex. commercial, de transit, touristique.

A l'instar des autres tableaux figurant dans ce volume, le tableau 6 présente les données sur l'utilisation pour chaque mois entre avril et septembre et le total pour ces mois. L'unité de mesure est toujours le nombre de véhicules, à l'exception du cas du Parc national des Îles du Saint-Laurent, dans la région de l'Ontario, qui établit l'utilisation d'après le nombre de personnes.

Les lecteur désireux de savoir pour quelles entrées précises les données ont été établies peut se reporter à une section spécialement prévue à cette fin à la fin du présent chapitre. Les entrées pour lesquelles des données avaient été établies y sont énumérées par ordre alphabétique pour chaque parc.

CHAPITRE III UTILISATION DES INSTALLATIONS ET DES SERVICES DES PARCS  
NATIONAUX (A L'EXCEPTION DES TERRAINS DE CAMPING)

Les données présentées dans ce chapitre concernent à la fois les installations et les services de présentation et les services offerts aux visiteurs (à l'exception des terrains de camping). Ces deux catégories d'installations et de services sont combinées dans les données du tableau 5, portant sur les installations et les services. Comme nous l'avons fait remarquer au chapitre I, la nouvelle classification prévue des installations et des services des parcs permettra de séparer en deux parties, dans les rapports futurs, les données concernant les services de présentation et celles concernant les services offerts aux visiteurs.

Le classement des données dans le tableau 5 est semblable à celui utilisé pour les données concernant les terrains de camping, c'est-à-dire que la répartition est faite aussi par région, par parc et ensuite par installation individuelle. Une description des données contenues dans le tableau 5 est faite dans la section suivante.

TABLEAU 5 - INSTALLATIONS ET SERVICES OFFERTS PAR LES PARCS NATIONAUX:  
BILAN DE L'UTILISATION, 1er AVRIL AU 30 SEPTEMBRE

Nombre de jours d'ouverture\*: nombre de jours en 1974 et en 1975 pendant lesquels l'installation ou le service était ouvert au public, pour chaque mois d'avril à septembre, et le total pour ces mois.

Utilisation: nombre de personnes, de groupes ou d'embarcations ayant utilisé l'installation ou le service en 1974 et en 1975, pour chaque mois d'avril à septembre, et le total pour ces mois.

Variation de l'utilisation, 1974-1975: la différence entre le nombre de personnes, de groupes ou de bateaux ayant utilisé l'installation ou le service pendant l'année 1974, par rapport à l'année 1975, en nombre (DIFF) et en pourcentage (DIFF. %), pour chaque mois d'avril à septembre, et la différence totale pour ces mois.

Unité de mesure: l'unité dans laquelle le compte ou l'approximation du degré d'utilisation a été fait. Il pourrait s'agir de nombre de personnes, de groupes ou de bateaux selon le genre d'installation ou de service.

\*Le total du parc n'est pas fourni pour ces données.

\*A l'exception des terrains de camping

\* EXCLUT LES TERRAINS DE CAMPING COLLECTIF.

Nota: Au parc national Jasper, les terrains de camping des rivières Fiddlee et Rocky ont fermé à la fin de l'été 1974. On n'a pas de statistiques sur le terrain de camping du lac Célestine qui était cependant ouvert en 1975.

\* EXCLUT LES TERRAINS DE CAMPING COLLECTIF.

PARKS CANADA REGIONS  
RÉGIONS DE PARCS CANADA

Atlantic-Atlantique

Nota: Certains aménagements et services pour lesquels des données d'utilisation furent fournies dans le passé, n'apparaissent pas dans ce rapport. Dans plusieurs cas, un parc n'a pas soumis de données à la Division de la recherche socio-économique à temps pour qu'elles soient incluses dans ce rapport.

3. Variation du nombre de nuit-personnes, 1974-1975: différence entre le nombre de personne ayant passé une nuit dans un terrain de camping collectif pendant l'année 1974, par rapport à l'année 1975, en nombre (DIFF) et en pourcentage (DIFF. %), pour chaque mois d'avril à septembre, et la différence totale pour ces mois.

3. Variations du nombre de nuits-groupes 1974-1975: la différence entre le nombre de groupes ayant passé une nuit dans des emplacements de camping de parc en 1974, par rapport à 1975, en nombre (DIFF) et en pourcentage (DIFF %), pour chaque mois d'avril à septembre, et la différence totale pour ces mois.

TABLERAU 2 - TERRAINS DE CAMPING DANS LES PARCS NATIONAUX: RENSEIGNEMENTS SUR L'OCCUPATION, 1er AVRIL AU 30 SEPTEMBRE 1975

1. Pourcentage des emplacements occupés: pourcentage d'emplacements des terrains de camping de parc qui étaient occupés pendant les jours de semaine et les week-ends pour chaque mois d'avril à septembre 1975, et le total de ces mois.
2. Nombre de nuits où l'occupation est d'au moins 90%: nombre de nuits pendant l'année 1975 pendant lesquelles l'occupation des emplacements des terrains de camping de parc était d'au moins 90% pendant les jours de semaine et les fins de semaine pour chaque mois d'avril à septembre, et le total de ces mois.
3. Ouverture (nombre de nuits)\*: nombre de nuits en 1975 pendant lesquelles le terrain était ouvert au public pour chaque mois d'avril à septembre, et le total de ces mois.

TABLERAU 3 - TERRAINS DE CAMPING DANS LES PARCS NATIONAUX: CHANGEMENTS DANS L'UTILISATION (%), 1974, PAR RAPPORT A 1975.

1. Changements dans l'utilisation (%): changements dans les nombres de groupes passant une nuit dans les emplacements des terrains de camping de parc pendant les jours de semaine et les fins de semaine, entre l'année 1974 et l'année 1975 pour chaque mois d'avril à septembre, et le total de ces mois.

TABLERAU 4 - TERRAINS DE CAMPING COLLECTIF DANS LES PARCS NATIONAUX: BILAN DE L'UTILISATION, 1er AVRIL AU 30 SEPTEMBRE.

1. Ouverture (nombre de nuits): Nombre de nuits en 1974 et 1975 pendant lesquelles un terrain de camping collectif était ouvert au public, pour chaque mois d'avril à septembre, et le total pour ces mois.
2. Nombre de nuits-personnes: Nombre de personnes ayant passé une nuit dans un terrain de camping collectif en 1974 et 1975, pour chaque mois d'avril à septembre, et les totaux pour ces mois.

\* Le total du parc n'est pas fourni pour ces données

## CHAPITRE II UTILISATION DES TERRAINS DE CAMPING DES PARCS NATIONAUX

Quatre tableaux distincts contiennent les données sur les terrains de camping des parcs nationaux. Les tableaux 1 à 3 présentent les données sur l'utilisation des terrains ayant des emplacements individuels. Le tableau 4 présente les données sur les terrains de camping collectif.

Les données sur les terrains de camping sont classées de la manière suivante: la première répartition est par région, les données de la région de l'Atlantique venant en tête, suivies de celles de la région du Québec et ainsi de suite, jusqu'à celles de la région de l'Ouest; à l'intérieur de chaque région, les données sont classées par parc qui, eux sont énumérés par ordre alphabétique; à l'intérieur de chaque parc, les données sur les divers terrains sont présentées suivant le code numérique qui leur a été attribué par Parcs Canada.

Il serait préférable de présenter les terrains de camping d'après l'ordre alphabétique, pour aider le lecteur à trouver des données concernant les divers terrains. Comme nous l'avons déjà fait remarquer au chapitre I, cette difficulté sera surmontée par la mise en application, pendant l'année financière de 1976-1977, de la nouvelle méthode de traitement des données.

Tous les tableaux qui présentent des données sur l'utilisation des terrains de camping sont disposés de la manière suivante: (1) le numéro du tableau et le titre sont centrés en haut de la page; (ii) le nom du parc figure au côté gauche supérieur du tableau; (iii) lorsque cela a une utilité quelconque, les totaux des données pour chaque parc sont établis et inscrits à la fin de chaque ensemble, de données sur les terrains de camping.

Les données qui figurent dans chacun des tableaux concernant les terrains de camping sont décrites brièvement dans la partie suivante.

### TABLEAU 1 - TERRAINS DE CAMPING DANS LES PARCS NATIONAUX: BILAN DE L'UTILISATION, 1er AVRIL AU 30 SEPTEMBRE

1. Ouverture (nombre de nuits)\*: nombre de nuits chaque mois pendant lesquelles le terrain était ouvert au public entre avril et septembre, et le total de tous ces mois. Les chiffres correspondants pour les années 1974 et 1975 sont fournis à titre de comparaison.

2. Nombre de nuits-groupes: nombre de groupes passant une nuit dans les emplacements de camping de parc pour chaque mois entre avril et septembre, et le total de ces mois. Les chiffres correspondants de 1974 et de 1975 sont fournis.

\*Le total du parc n'est pas fourni pour ces données.

DES TERRAINS DE CAMPING DES PARCS NATIONAUX

UTILISATION

CHAPITRE II

c)

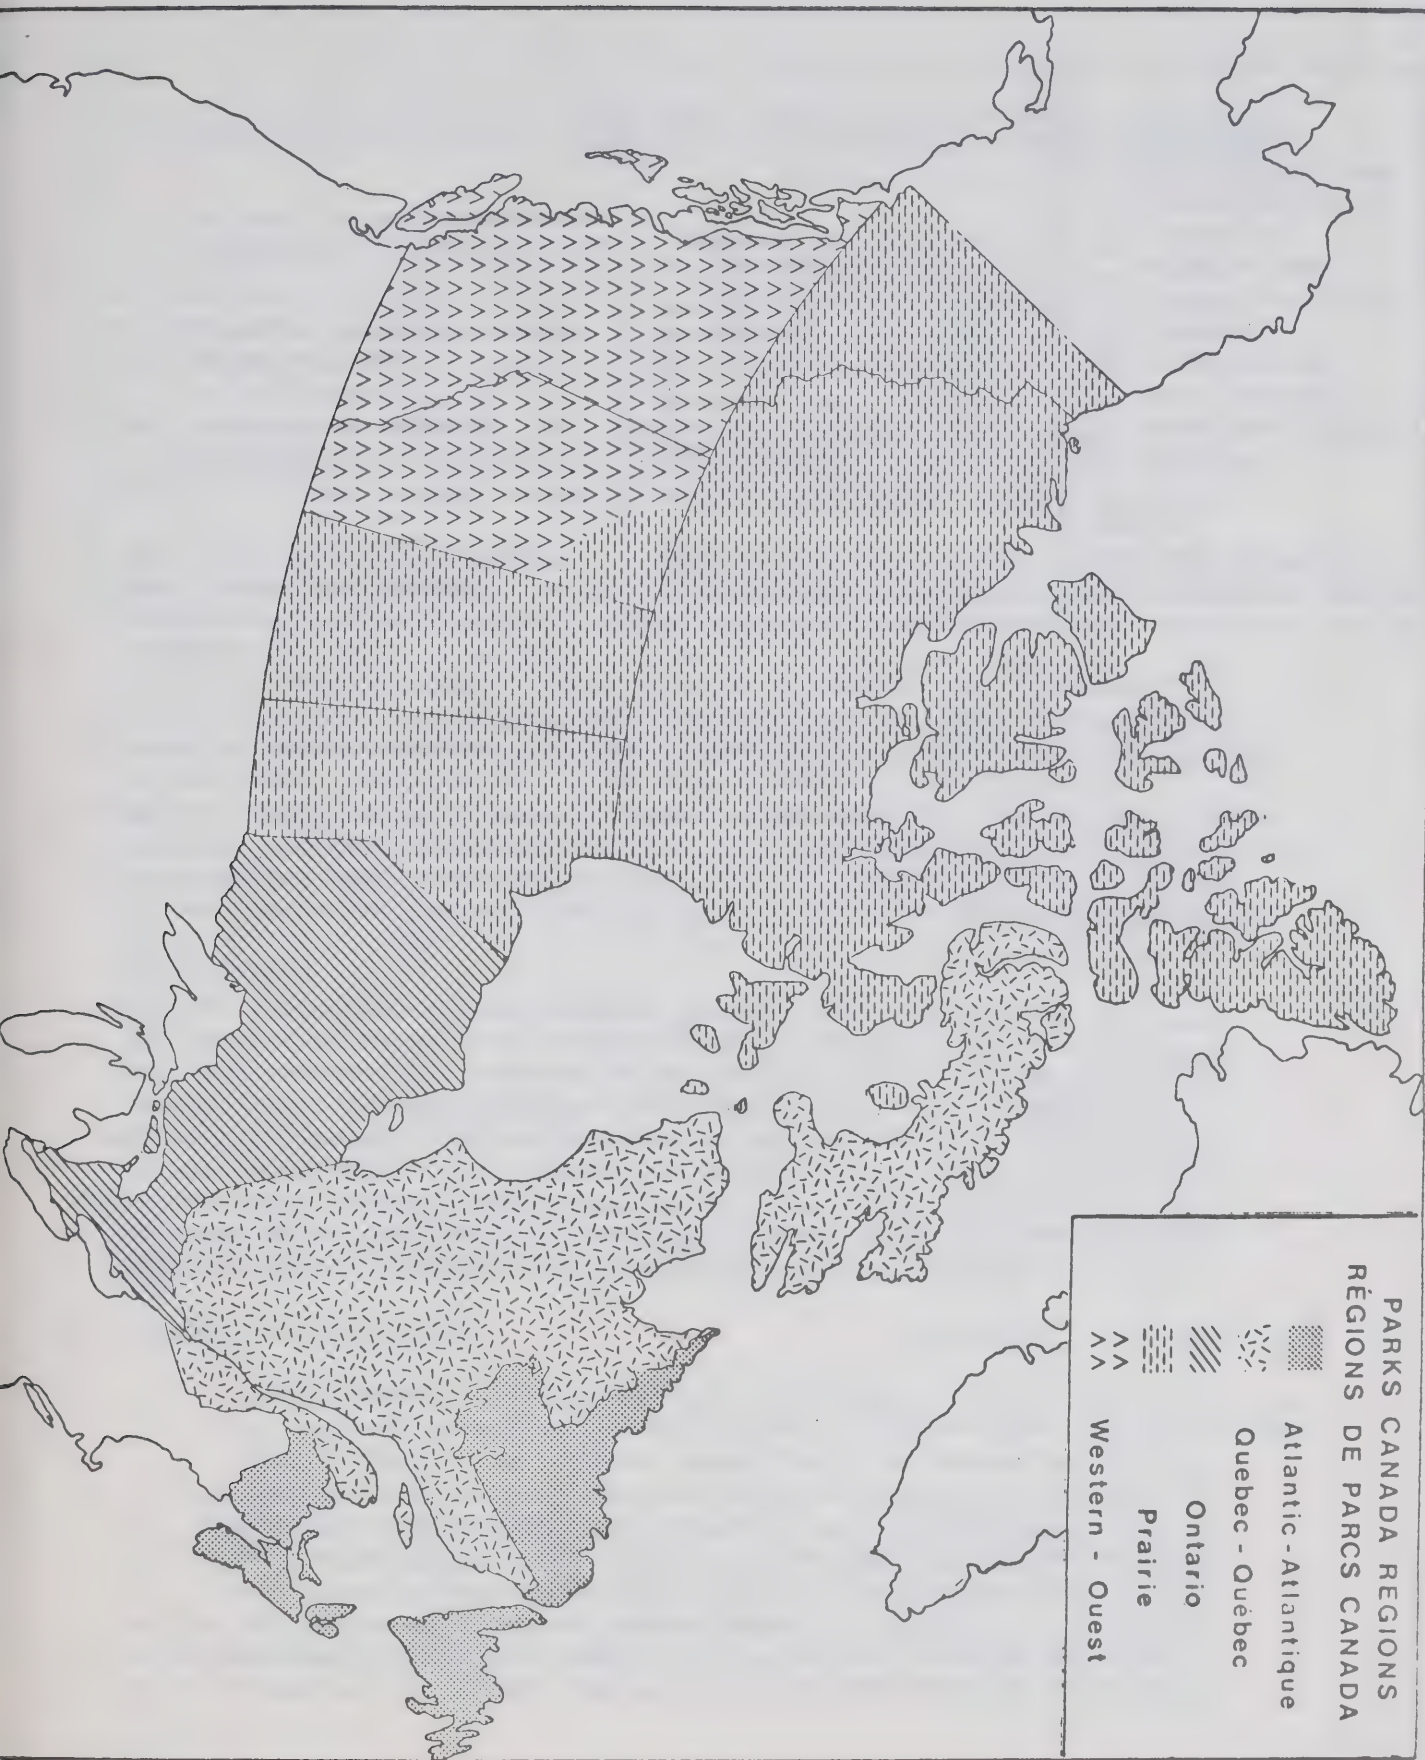

Emplacement des cartes de référence

La méthode actuelle de traitement des données ne permet pas de les distribuer selon les rubriques de classification prévues pour les rapports futurs. Les données concernant les entrées et les terrains de camping sont présentées dans des tableaux différents, et les données concernant les services de présentation et les services offerts aux visiteurs (à l'exclusion des terrains de camping) figurent dans le même tableau. On devrait noter le fait que les installations et les services ne sont pas énumérés selon l'ordre alphabétique à l'intérieur de chaque tableau. Cette situation sera modifiée avec l'adoption de la nouvelle méthode de traitement des données.

d)

Vos observations

La nouvelle méthode de présentation des données sur l'utilisation des parcs ayant été élaborée pour la composition de ce volume, la Division de la recherche socio-économique saurait gré à ses lecteurs de bien vouloir lui faire parvenir des observations concernant l'utilité de cette nouvelle présentation. La DRSE aimerait, tout particulièrement, savoir si les renseignements qui figurent dans ce volume ont pu servir au lecteur. Si le lecteur est d'avis que des chiffres autres que ceux fournis par ce rapport auraient une plus grande utilité, il est prié d'en faire part à la DRSE.

**PARKS CANADA REGIONS  
RÉGIONS DE PARCS CANADA**

-  Atlantic-Atlantique
-  Quebec-Québec
-  Ontario
-  Prairie
-  Western - Ouest

(iii) La nouvelle présentation permettra au personnel de la DRSE d'établir un rapport statistique sur l'utilisation des parcs dans des délais beaucoup plus brefs qu'auparavant. En conformité avec le principe général de compression des rapports, nous prévoyons à l'avenir, de limiter encore plus le nombre de données figurant dans les tableaux. Notre objectif est de pouvoir publier le rapport en décembre suivant la saison d'été. Ainsi, les données seront prêtes au moment où elles ont le plus d'utilité, à savoir pour la préparation des prévisions budgétaires.

b) Disposition des données

Les données sur l'utilisation des entrées, des installations et des services sont groupées de la manière suivante dans le présent rapport: le chapitre 2 contient les données sur les terrains de camping; le chapitre 3 contient les données sur les installations et les services récréatifs, à l'exception des terrains de camping; et le chapitre 4 contient les données, résumées pour chaque parc, sur le nombre de véhicules passant par les entrées où on exerce un contrôle du trafic. Les données de base et la description des tableaux contenant les données sur l'utilisation figurent au début des chapitres 2 à 4 inclusivement.

Il faut faire une précision sur la manière dont les installations et les services des parcs sont classifiés. Cette classification fait actuellement l'objet de modifications et elle continuera à changer en fonction des possibilités de plus en plus nombreuses qu'offre la nouvelle méthode de traitement des données. Nous nous attendons à ce que cette nouvelle méthode puisse être mise en application pendant l'année financière 1976-1977. La méthode de classification utilisée dans le passé et celle qui sera utilisée à l'avenir sont indiquées dans le schéma suivant:

|  |  |   |
|--|--|---|
| CLASSIFICATION UTILISÉE<br>DANS LES RAPPORTS PRÉCÉDENTS    | CLASSIFICATION UTILISÉE<br>DANS LE RAPPORT DE 1975                   | CLASSIFICATION PRÉVUE<br>POUR LES RAPPORTS<br>FUTURS  |
| 1. entrées   | 1. entrées   | 1. entrées  |
| 2. terrains de camping                                     | 2. terrains de camping   | 2. services offerts<br>aux visiteurs  |
| 3. installations et<br>services de présentation            | 3. services et installations (à l'exclusion des terrains de camping) | a) terrains de camping<br>aux visiteurs   |
| 4. services et installations<br>autres que de présentation |  | b) autres services<br>offerts aux visiteurs<br>et installations et services de présentation |

Le Rapport statistique 1973-1974 contient également des statistiques sur les tendances. Le chapitre V de chaque volume offre des données sur l'utilisation des terrains de camping ordinairement pour les années 1968 à 1974, ainsi que des données sur les terrains de camping collectif pour les années 1972 à 1974. Des chiffres sur la fréquentation des parcs nationaux et des lieux et des parcs historiques nationaux sont présentés pour les années financières de 1950-51 à 1974-75.

2 Parcs nationaux: Données sur l'utilisation des parcs en 1975

## a) Nouvelle présentation

Le titre du présent rapport, Parcs nationaux: Données sur l'utilisation des parcs en 1975, donne à entendre qu'il ne contient pas de données concernant les lieux et les parcs historiques nationaux. Les données sur l'utilisation des parcs nationaux y sont présentées sous forme de tableaux qui montrent en abrégé le degré d'utilisation des entrées, des installations et des services entre les mois d'avril et de septembre. Les données concernant le mois d'octobre figuraient dans les rapports précédents. Nous étions toutefois d'avis qu'en éliminant le mois en question, la publication du présent rapport serait accélérée.

Les histogrammes ont également été éliminés de ce rapport. Toutefois, nous sommes toujours en mesure d'en établir, et toute demande d'un histogramme précis peut être envoyée à la Division de la recherche socio-économique (DRSE) à Ottawa. Le délai de livraison sera d'environ deux à trois semaines, et plus, dans le cas d'un grand nombre d'histogrammes.

Plusieurs facteurs, qui seront expliqués ci-après, ont motivé l'adoption d'une nouvelle forme de présentation des données:

- (1) Le nombre sans cesse croissant de données n'aurait pas tardé à rendre nécessaire l'établissement de volumes si épais que le lecteur aurait eu du mal à trouver les renseignements précis qu'il désire.

- (11) Un rapport commandé par Parcs Canada et intitulé Park Use Statistics Collected by Parcs Canada: Status and Recommendations

recommanda de cesser la publication du Rapport statistique dans sa forme actuelle. Les résultats de cette étude ainsi que des observations qui ont été faites à la DRSE par des lecteurs du Rapport démontrent que le coût élevé entraîné par la publication de données de ce genre dans les rapports précédents (surtout pour les histogrammes) n'est pas justifié par l'utilisation réelle qui est faite de ces données.

# I Données de base

## a) Aperçu des rapports précédents présentant des données concernant l'utilisation des parcs

Dans le passé, les données concernant l'utilisation des parcs nationaux du Canada ont été présentées dans le Rapport statistique. Un rapport contenant des données sur les terrains de camping des parcs nationaux fut établi en 1968, en 1969 et en 1970. En 1971, 1972 et 1973-1974, le Rapport statistique fut élargi pour pouvoir comprendre des données sur les entrées, les installations et les services de présentation ainsi que sur les services offerts aux visiteurs (y compris les terrains de camping).

Depuis 1969, des histogrammes et des feuilles d'analyse ont été utilisés pour présenter les données dans le Rapport. L'histogramme est un graphique montrant le degré d'utilisation inscrite pour chaque jour de la saison d'une installation donnée. La feuille d'analyse présente les mêmes données que l'histogramme, mais sous forme tabulaire. Par la suite ces deux types de documents ont fait l'objet, avec chaque nouveau Rapport statistique, de modifications du point de vue du contenu, au fur et à mesure que les besoins en renseignements ont été plus clairement définis. Les feuilles d'analyse du Rapport statistique 1973-1974 contiennent des données concernant, en autres, l'utilisation des entrées, des installations ou des services par mois, l'utilisation par genre de journée et une comparaison entre les données sur l'utilisation de 1973 et de 1974. Les Rapports statistiques de 1971, 1972 et 1973-1974 contiennent également une description d'un certain nombre d'études spéciales qui furent effectuées par Parcs Canada ou sous ses auspices.

## b) Documentation: Rapport statistique 1973-1974

Il faut donner quelques précisions sur le Rapport statistique 1973-1974. Le premier chapitre de chaque volume de ce Rapport est consacré à l'évaluation des méthodes de rassemblement et de transmission des données utilisées pour les parcs nationaux, les lieux et les parcs historiques nationaux et l'ARC (Accords sur les loisirs et la conservation). Le chapitre I contient également des définitions qui sont essentielles pour la compréhension des statistiques sur l'utilisation des parcs. On prévoit que ce chapitre servira, de manière permanente, de document de référence sur la méthode de rassemblement et de transmission des données. Le présent rapport fournira donc très peu de renseignements de base. Le lecteur novice en matière de rassemblement et de transmission des données ferait bien de consulter le Rapport statistique 1973-1974.

Our file    Notre référence

Park-Use Statistics 1976-1977 is the most recent edition of Parks Canada's annual statistical reference on the use of national parks and national park services. This year, the introduction of computer-printed park-use record forms, the standardization of facility names and a reduction in the amount of data presented have made it possible to publish the statistical reference much earlier than in previous years.

Changes in this year's reference include a change in the reporting time frame. To better meet the needs of planners and managers, this statistical reference reports data for the fiscal year April 1, 1976 to March 31, 1977. The manner in which information is presented has not changed considerably from the previous 1975 report. The one major change is that, this year, all data for each region are grouped together in chapter five; "Park-Use Statistics"; each region is indicated by an index tab.

Données sur l'utilisation des parcs 1976-1977 est la dernière édition du rapport annuel sur l'utilisation des parcs et des services offerts aux visiteurs de parcs nationaux. Cette année, l'adoption des formulaires informatisés sur l'utilisation des parcs, la normalisation des désignations d'installations et une diminution dans le volume de l'information à traiter nous ont permis de publier le rapport beaucoup plus tôt que par le passé.

Au nombre des changements apportés au rapport de cette année, soulignons la période de temps qu'il vise. Afin de mieux répondre aux besoins des planificateurs et des gestionnaires, le rapport inclut les données de l'année financière du 1er avril, 1976 au 31 mars, 1977. La présentation des données est essentiellement la même que l'an dernier, la principale différence étant que cette année, toutes les données d'une région ont été groupées ensemble au chapitre 5, "Données sur l'utilisation des parcs". Chaque région est indiquée par un onglet.

...2

The reference is organized into five chapters, the first and second providing introductory and explanatory information. Chapter two in particular gives directions for reading and interpreting the statistics given in the tables. Chapter three contains the overview tables, providing statistics on a regional and national basis. Two fiscal years of data are provided and comparisons made.

Chapter four contains trend-statistics over a number of years. This chapter is a self-contained unit within the reference, with explanatory information preceding each set of tables. Chapter five contains statistics for:

1. Visitor Services

- a) gates
- b) campgrounds
- c) other visitor services.

2. Interpretation and Extension Facilities and Services.

Tables in chapter five are grouped by region. The tables present statistics for each park, listed alphabetically. For each park, information is presented by the name of the individual facilities and services (excluding gates), in alphabetical order.

Le rapport se divise en cinq chapitres. Les premier et deuxième chapitres contiennent une introduction et des explications. Plus particulièrement, le deuxième chapitre explique comment lire et interpréter les statistiques présentées dans les tableaux. Le chapitre 3 présente les statistiques d'ensemble pour les régions et pour tout le système. Pour fins de comparaison, nous présentons des données portant sur les deux dernières années financières.

Le chapitre 4 contient les statistiques des tendances. Ce chapitre est une unité complète à l'intérieur du rapport avec des explications précédant chaque ensemble de tableaux. Le chapitre 5 contient des statistiques pour:

1. Les services d'accueil aux visiteurs

- a) les postes d'entrées
- b) les terrains de camping
- c) d'autres services d'accueil aux visiteurs.

2. Installations et services d'interprétation et de diffusion.

Vous retrouverez toutes les données portant sur une région dans une même section du chapitre. Pour chaque parc, suivant l'ordre alphabétique, les statistiques sont présentées par installation ou service (sauf les entrées) toujours suivant l'ordre alphabétique.

Data for interpretation and extension facilities and services are grouped under the three headings:

- (i) inside park non-personal facilities;
- (ii) inside park personal services;
- (iii) outside park personal services.

Fourteen tables comprise this year's statistical reference, titled as follows:

#### Overview Statistics

1. Attendance at National Parks
2. Attendance at National Historic Parks and Sites
3. Use of Regular Campgrounds
4. Use of Group Campgrounds
5. Use of Interpretation and Extension Facilities and Services

#### Trends Statistics

6. Trends in Campground Use
7. Trends in National Parks Attendance
8. Trends in National Historic Parks and Sites Attendance

Les données sur l'utilisation d'installations et de services d'interprétation et de diffusion sont présentées en trois catégories:

- (i) installations à caractère impersonnel à l'intérieur du parc;
- (ii) services à caractère personnel à l'intérieur du parc;
- (iii) services à caractère personnel à l'extérieur du parc.

Ce rapport comprend quatorze ensembles de tableaux:

#### Statistiques d'ensemble

1. Fréquentation des parcs nationaux
2. Fréquentation des parcs et lieux historiques nationaux
3. Utilisation des terrains de camping réguliers
4. Utilisation des terrains de camping collectifs
5. Utilisation des installations et des services d'interprétation et de diffusion

#### Statistiques des tendances

6. Tendances de l'utilisation des terrains de camping
7. Tendances de la fréquentation des parcs nationaux
8. Tendances de la fréquentation des parcs et lieux historiques nationaux

Park-Use Statistics

9. Summary of Volume of Traffic Entering National Parks
10. National Park Campgrounds: Summary of Use
11. National Park Campgrounds: Occupancy Information
12. National Park Group Campgrounds: Summary of Use
13. National Park Visitor Services and Facilities: Summary of Use
14. Summary of National Park Interpretation and Extension Contacts

Park-Use Statistics 1976-1977

is a more compact, easy-to-read document than previous issues. With the implementation of new data collecting and recording procedures, the document can be made available in sufficiently short time to be of use in planning for the current year. Along with the recently established monthly campground statistics reports

Données sur l'utilisation des parcs

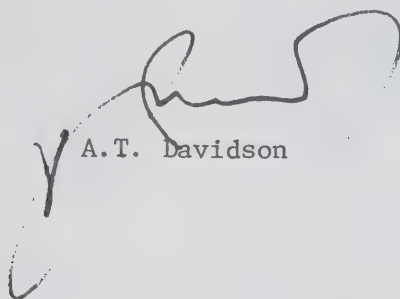

9. Bilan du nombre de véhicules entrant dans les parcs nationaux
10. Terrains de camping dans les parcs nationaux: bilan de l'utilisation
11. Terrains de camping dans les parcs nationaux: renseignement sur l'occupation
12. Terrains de camping collectifs dans les parcs nationaux: bilan de l'utilisation
13. Installations et services offerts par les parcs nationaux: bilan de l'utilisation
14. Sommaire statistique des contacts d'interprétation et de diffusion dans les parcs nationaux.

Données sur l'utilisation des

parcs 1976-1977 est un document plus court et plus facile à lire que les éditions précédentes. A cause de l'adoption des nouvelles méthodes pour recueillir les statistiques, il est maintenant possible de publier le rapport en temps pour qu'on puisse s'en servir lors de l'élaboration des plans pour l'année en cours. Cette documentation statistique fait maintenant partie du système

and interpretative contacts reports, this annual statistical reference forms part of the Socio-Economic Research Division's "Park-Use Statistics Information System". This system is designed to provide complete ongoing statistical information for Parks Canada planning, management and policy formulation.

de données sur l'utilisation des parcs de la DRSE au même titre que les récents rapports de données sur les terrains de camping et les rapports trimestriels sur les contacts de diffusion et d'interprétation. Ce système vise à fournir de l'information statistique complète et courante pour aider à la planification, à la gestion et à l'élaboration de politiques pour Parcs Canada.

A.T. Davidson

## ACKNOWLEDGEMENTS

Park-Use Statistics is produced annually by the Research Information Section of the Socio-Economic Research Division (SERD) under the supervision of Leo Lehtiniemi, Co-ordinator of Statistical Information. Lacey Lavigne, Acting Head of the Research Information, oversaw the preparation of this year's report. Gail Young prepared the written text of chapters one and two. Serge Rousseau prepared the chapter on trend-statistics. Final editing and preparation for publication was done by Ron Melchers.

SERD acknowledges the continuing support of the Computer Information Systems Division (C.I.S.) in this and other activities relating to SERD's Statistical Information System.

## REMERCIEMENTS

Données sur l'utilisation des parcs est publié à chaque année par la Section de l'Information sur la recherche de la Division de la recherche socio-économique (DRSE), sous la direction de Léo Lehtiniemi, Co-ordinateur de l'information statistique. Lacey Lavigne, chef par interim de la Section, a été responsable pour la publication du rapport pour cette année. Le texte des chapitres 1 et 2 a été écrit par Gail Young. Serge Rousseau a préparé le chapitre sur les statistiques des tendances. Ron Melchers s'est occupé de faire la mise au point final du texte et sa préparation en vue de la publication.

La DRSE remercie la Division de l'Informatique pour l'appui constant qu'elle nous a prêté lors de la préparation de ce rapport et d'autres éléments du système de l'information statistique sur l'utilisation des parcs.

Chapter 1  
INTRODUCTION

Chapitre 1  
INTRODUCTION

## CHAPTER 1

## INTRODUCTION

## A. BACKGROUND

This volume is the latest edition in Parks Canada's series of yearly reports on park-use statistics. From 1968 to 1970, statistics on campground use were the only regularly reported data published on a yearly basis. In 1971, the first statistical reference appeared, marking the beginning of a more complete statistical report, expanded to include park-use statistics for a wide variety of park facilities and services. Statistical references for 1972 and for the years 1973 and 1974 (combined in one report) have also been published.

The format and content of the statistical references have varied from year to year in response to the needs of users of the documents. For example, the 1973-1974 Statistical Reference contained detailed information on the data collection and reporting procedures used at National Parks and National Historic Parks and Sites. This section was added because it was felt that for proper use to be made of the tables and histograms presented in the Reference, readers should be aware of how the data had been derived and thus be alerted to some of the inherent limitations of the data.

With the statistical report for 1975, National Parks: 1975 Park-Use Statistics, the Socio-Economic Research Division (SERD)

## CHAPITRE 1

## INTRODUCTION

## A. HISTORIQUE

Le présent document est le dernier paru dans la série de rapports statistiques annuels produits par Parcs Canada sur l'utilisation des parcs nationaux. De 1968 à 1970, les statistiques sur l'utilisation des terrains de camping étaient les seules données recueillies régulièrement qui faisaient l'objet d'une publication annuelle. Le premier rapport statistique fit son apparition en 1971, ce qui marquait le lancement d'un rapport statistique plus complet, dont on a élargi le cadre pour y intégrer des données sur l'utilisation d'une vaste gamme d'installations et de services dans les parcs nationaux. Un rapport statistique a également été publié en 1972 et pour l'ensemble des années 1973 et 1974.

On a modifié d'une année à l'autre la présentation et le contenu des rapports statistiques afin de répondre aux besoins des usagers des documents. Par exemple, le rapport statistique 1973-1974 renfermait des renseignements détaillés sur les méthodes de collecte et d'enregistrement des données utilisées dans les parcs nationaux ainsi que dans les parcs et lieux historiques nationaux. On a ajouté cette section parce qu'on estimait que pour utiliser de manière appropriée les tableaux et les histogrammes présentés dans le rapport, le lecteur devait savoir comment les données avaient été établies et être ainsi averti des limitations inhérentes aux données.

Dans son rapport statistique de 1975, Statistiques sur l'utilisation des parcs nationaux (1975), la Division de la recherche

embarked on a new approach to the presentation of regularly collected park-use statistics. In addition to the development of a new format for the tables, the length of the report was greatly reduced. The text was shortened and histograms eliminated, although these are available on request. These changes were introduced to permit SERD staff to produce a report on park-use statistics more quickly.

The 1975 report, which presented data for the months of April to September only, was distributed in May of 1976. Publishing the yearly statistical report as soon as possible after the period under consideration is one of SERD's major goals.

#### B. THE 1976-1977 STATISTICAL REPORT

##### 1. New Forms for Recording Park-Use Statistics

In April 1976 a new set of forms for recording park-use statistics was introduced to the National Parks. The Socio-Economic Research Division designed the Park-Use Record Form for recording data for gates (NPC 596), campgrounds (NPC 595) and other types of visitor services (NPC 594). The Interpretation and Extension Division designed the Interpretive Contact Statistics - Monthly Report form for use at interpretation and extension facilities and services. These two types of forms replaced the Daily Record Forms (NPC 503, 504, 505).

socio-économique (DRSE) adoptait une nouvelle méthode pour la présentation des données recueillies régulièrement sur l'utilisation des parcs. En plus d'offrir une nouvelle présentation des tableaux, le rapport était beaucoup moins long. Le texte a été réduit et les histogrammes éliminés ceux-ci sont toutefois disponibles sur demande. On a apporté ces modifications pour permettre au personnel de la Division de la recherche socio-économique de réaliser plus rapidement que dans le passé, la production du rapport sur l'utilisation des parcs.

Le rapport de 1975, qui présentait des données pour les mois d'avril à septembre seulement, a été distribué en mai 1976. La Division de la recherche socio-économique vise à publier le rapport statistique annuel aussitôt que possible après la fin de la période faisant l'objet du rapport.

#### B. LE RAPPORT STATISTIQUE 1976-1977

##### 1. Nouveaux formulaires pour l'enregistrement des données sur l'utilisation des parcs

En avril 1976, on a introduit dans les parcs nationaux une nouvelle série de formulaires pour l'enregistrement des données sur l'utilisation des parcs nationaux. La Division de la recherche socio-économique a conçu le formulaire: Relevé d'utilisation du parc pour enregistrer les données reliées aux postes d'entrée (NPC 596), aux terrains de camping (NPC 595) et aux autres types de services aux visiteurs (NPC 594). La Division de la présentation et de la vulgarisation a mis au point le formulaire: Statistiques d'interprétation - rapport mensuel,

utilisé dans le cas des installations et services d'interprétation et de diffusion. Ces deux formulaires ont remplacé les feuilles de relevé quotidien (NPC 503, 504, 505).

While the data collection procedures as described in the 1973-1974 Statistical Reference have remained much the same, the introduction of the new forms has streamlined the data recording process. Most of the information on the Park Use Record Form is pre-printed by computer resulting in fewer changes made in the descriptive information at the Park level. The number of facilities and services for which use data are required has been reduced. Now, data are recorded on only those facilities for which use data are relevant on a system-wide basis. In the case of interpretation and extension facilities and services, only monthly totals are sent to Ottawa. A sample of the Park-Use Record Form for visitor services (all three Park-Use Record Forms are identical except for colour) and the Interpretive Contact Statistics - Monthly Report form are in the appendix.

## 2. Time Frame

In the 1973-1974 Statistical Reference the time frame was the "research year"; defined as the time interval from November 1 of one year to October 31 of the following year. In the 1975 statistical report, data were supplied for the months of April to September only. In response to suggestions from Parks Canada

Tandis que la méthode de collecte des données décrite dans le Rapport statistique 1973-1974, est restée sensiblement la même, l'introduction des nouveaux formulaires a simplifié l'enregistrement des données. La plupart des renseignements contenus dans le relevé d'utilisation du parc sont préimprimés par ordinateur ce qui entraîne moins de changements dans l'information descriptive au niveau du parc. Le nombre d'installations et de services pour lesquels on a besoin de données sur l'utilisation a été réduit. On n'enregistre maintenant des données que pour les installations dont les données d'utilisation sont applicables à l'ensemble du réseau. Dans le cas des installations et services d'interprétation et de diffusion, on ne communique que les totaux mensuels à Ottawa. L'appendice contient des spécimens des formulaires: Relevé d'utilisation du parc pour les services aux visiteurs (les trois formulaires de relevé d'utilisation sont identiques excepté la couleur) et Statistiques d'interprétation - rapport mensuel.

## 2. Cadre temporel

Le cadre temporel du Rapport statistique 1973-1974 était "l'année de recherche", c'est-à-dire l'intervalle entre le 1er novembre d'une année et le 31 octobre de l'année suivante. Dans le cas du rapport statistique de 1975, les données ne portaient que sur les mois d'avril à septembre. A la suite de suggestions du

staff, the fiscal year (April 1 to March 31) has been adopted as the time period for which data will be reported in the 1976-1977 statistical report. This shift in time frame will have little effect on data for those facilities and services which are of a seasonal nature; e.g. open from May to September.

### 3. Organization of the Report

The first two chapters of the 1976-1977 statistical report contain introductory and explanatory material. Chapter four provides trend statistics. The tables which present park-use statistics are in Chapters three and five. For readers who find the data in Chapters three and five to be of primary interest, Chapter two, READING THE TABLES, is the one introductory chapter which should not be overlooked. CHAPTER TWO IS INDISPENSABLE IF THE DATA PRESENTED IN CHAPTERS THREE AND FIVE ARE TO BE CORRECTLY INTERPRETED.

The contents of each chapter are briefly summarized below.

Chapter One - BACKGROUND, contains a summary of SERD's new park-use statistics information service and the organizational scheme for the entire report.

Chapter Two - READING THE TABLES, is the most important chapter for readers who will make use of the tables. In this chapter is a comprehensive discussion of the format of each of the types of tables for park-use data and instructions on how to correctly read the tables.

personnel de Parcs Canada, on a adopté l'année financière (du 1er avril au 31 mars) comme cadre temporel du rapport statistique 1976-1977. Cette modification du cadre temporel aura peu d'effet sur les données reliées aux installations et services à caractère saisonnier, c'est-à-dire qui fonctionnent de mai à septembre.

### 3. Présentation du rapport

Les deux premiers chapitres du rapport statistique 1976-1977 renferment des données d'introduction et des notes explicatives. Le chapitre 4 contient les statistiques des tendances. Les tableaux statistiques sur l'utilisation des parcs se trouvent aux chapitres 3 et 5. Les lecteurs pour qui les chapitres 3 et 5 sont d'une importance primordiale ont intérêt à lire, en guise d'introduction, le chapitre 2, LECTURE DES TABLEAUX. L'EXAMEN DU CHAPITRE 2 EST INDISPENSABLE POUR INTERPRÉTER CORRECTEMENT LES DONNÉES PRÉSENTÉES AUX CHAPITRES 3 ET 5.

Le contenu de chaque chapitre est résumé ci-après.

Chapitre 1 - DONNÉES DE BASE. Ce chapitre donne un aperçu du nouveau service d'information statistique sur l'utilisation des parcs et trace le plan du rapport.

Chapitre 2 - LECTURE DES TABLEAUX. C'est le chapitre le plus important pour les lecteurs qui utiliseront les tableaux. On y trouve des explications complètes sur la présentation de chacun des types de tableaux statistiques sur l'utilisation des parcs ainsi que le mode d'emploi des tableaux.

Chapter Three - OVERVIEW TABLES, contains tables which present national and regional data for National Parks and National Historic Parks and Sites. These tables show use only for the reporting period. However, park planners and managers can obtain additional information of this nature from SERD.

The tables in Chapter three are as follows:

Table 1: Attendance at National Parks

Table 2: Attendance at National Historic Parks and Sites

Table 3: Use of Regular Campgrounds

Table 4: Use of Group Campgrounds

Table 5: Use of Interpretation and Extension Facilities and Services

Chapter Four - TREND STATISTICS provides an analysis of trends in attendance and campground use for National Parks and National Historic Parks and Sites attendance and for National Park campground use. The tables are as follows:

Table 6: Trends in the Use of National Park Regular Campgrounds, 1968-1976

Table 7: Trends in National Parks Attendance, 1950-1976

Table 8: Trends in National Historic Parks and Sites Attendance, 1950-1976.

Chapitre 3 - TABLEAUX D'ENSEMBLE. Ce chapitre renferme des tableaux de statistiques nationales et régionales relatives aux parcs nationaux ainsi qu'aux parcs et lieux historiques nationaux. Ces tableaux indiquent, l'utilisation pour la seule période faisant l'objet du rapport; cependant, les planificateurs de parc ainsi que les gestionnaires peuvent obtenir d'autres renseignements de cette nature de la Division de la recherche socio-économique.

Les tableaux du chapitre 3 sont les suivants:

Tableau 1: Fréquentation des parcs nationaux

Tableau 2: Fréquentation des parcs et de lieux historiques nationaux

Tableau 3: Utilisation des terrains de camping réguliers

Tableau 4: Utilisation des terrains de camping collectifs

Tableau 5: Utilisation des installations et services d'interprétation et de diffusion.

Chapitre 4 - LES STATISTIQUES DES TENDANCES contient l'analyse des tendances et les prévisions de la fréquentation des parcs nationaux et des parcs et lieux historiques nationaux, et de l'utilisation des terrains de camping. Les tableaux de chapitre 4 sont les suivants:

Tableau 6: Tendances de l'utilisation des terrains de camping ordinaires, 1968-1976

Tableau 7: Tendances de fréquentation des parcs nationaux, 1950-1976

Tableau 8: Tendances de fréquentation des parcs et lieux historiques nationaux, 1950-1976.

Chapter Five - PARK USE STATISTICS, are the tables which present data on the use of National Park gates, visitor services facilities and interpretation and extension facilities and services. The tables in Chapter five are as follows:

Table 9: Summary of Volume of Traffic Entering National Parks;

Table 10: National Park Campgrounds: Summary of Use;

Table 11: National Park Campgrounds: Occupancy Information;

Table 12: National Park Group Campgrounds: Summary of Use;

Table 13: National Park Facilities and Services: Summary of Use (visitor services facilities only);

Table 14: Fiscal Year Statistical Summary of National Park Interpretation and Extension Contacts.

There is one major difference with previous reports in how the information is arranged. In presenting the data in the 1975 statistical report, facilities and services were divided in the following way: (i) gates, (ii) campgrounds, (iii) facilities and services (excluding campgrounds). One chapter was devoted to each of these components. Within each chapter the breakdown was by region, from east to west. For each region, the data were organized by park in alphabetical order. Within each park, individual facility and service data were ordered according to the numerical code assigned by SERD.

Chapitre 5 - STATISTIQUES SUR L'UTILISATION DES PARCS. Il s'agit de tableaux statistiques sur l'utilisation des postes d'entrée, des services aux visiteurs ainsi que des installations d'interprétation et de diffusion. Les tableaux du chapitre 5 sont les suivants:

Tableau 9: Bilan du nombre total de véhicules entrant dans les parcs nationaux;

Tableau 10: Terrains de camping dans les parcs nationaux: bilan de l'utilisation;

Tableau 11: Terrains de camping dans les parcs nationaux: renseignements sur l'occupation;

Tableau 12: Terrains de camping collectifs dans les parcs nationaux: bilan de l'utilisation;

Tableau 13: Installations et services offerts par les parcs nationaux: bilan de l'utilisation (services aux visiteurs seulement);

Tableau 14: Sommaire statistique des contacts d'interprétation et de diffusion dans les parcs nationaux pendant l'année financière.

Comparativement aux rapports précédents la présentation des données comporte une différence majeure. Pour la présentation des données du rapport statistique de 1975, on avait divisé les installations et services de la façon suivante: (i) postes d'entrée, (ii) terrains de camping, (iii) installations et services (à l'exclusion des terrains de camping). Un chapitre était consacré à chacun de ces éléments. A l'intérieur de chaque chapitre, on avait procédé à une ventilation par région, de l'est à l'ouest. Pour chaque région, les données étaient présentées par parc, dans l'ordre alphabétique, et pour

Gate data were presented by park only.

In the 1976-1977 statistical report, the five regions are used as the basis for arranging the information. All data for one region are grouped together. The regions are still ordered from east to west. The classification of data within each region is by: (i) visitor services, subdivided into (a) gates, (b) campgrounds, (c) other visitor services; (ii) interpretation and extension facilities and services. Within each facility and service type the parks are ordered alphabetically. Within each park, the individual facilities and services are ordered alphabetically, excluding gates, where only park totals are provided.

A major improvement in the organization of the data is the provision of separate tables for other visitor services-use data, and interpretation and extension-use data. The distinction between these two types of facilities and services is appropriate, not only for administrative reasons, but because they have different functions.

Other visitor services for which use data are reported are as follows: (i) golf courses; (ii) information centers; (iii) pools (all types); (iv) private group camps; (v) traffic counters; (vi) transportation systems; (vii) wilderness camping areas.

chaque parc, les données sur les services étaient disposées selon un chiffre assigné par la DRSE.

Les données des postes d'entrée étaient présentées par parc seulement.

Les cinq régions constituent la base de la présentation des données dans le rapport statistique 1976-1977. Toutes les données d'une région sont groupées, et là encore, les régions se succèdent d'est à l'ouest. Les données de chaque région sont classées par: (i) services aux visiteurs, subdivisés en (a) postes d'entrée, (b) terrains de camping, (c) autres services aux visiteurs; (ii) installations et services d'interprétation et de diffusion. Pour chaque type d'installations et de services, les parcs apparaissent dans l'ordre alphabétique. Pour chaque parc, les installations et services individuels apparaissent dans l'ordre alphabétique, sauf les postes d'entrée où l'on ne fournit que le total-parc.

La présentation de tableaux séparés pour les données sur l'utilisation des autres services aux visiteurs et les données sur l'utilisation des services d'interprétation et de diffusion, constitue une importante amélioration. La distinction entre ces deux types d'installations et de services est opportune, non seulement pour des raisons d'ordre administratif mais aussi parce que ces installations et services ont des fonctions différentes.

Les autres services aux visiteurs dont on fait rapport de l'utilisation sont les suivants: (i) terrains de golf; (ii) centres de renseignements; (iii) piscines (tous genres); (iv) terrains de camping collectifs privés; (v) compteurs de circulation; (vi) réseaux de transport; (vii) aires de camping en milieu sauvage.

With the exception of traffic counters, the visitor services listed above are designed to provide recreational activities to park visitors. Traffic counters are used to monitor the use of various areas in a park (not to be confused with traffic counters located at gates).

Use data for three types of interpretation and extension facilities and services are included in the 1976-1977 statistical report: (i) inside park non-personal facilities, e.g. self-guiding trails; (ii) inside park personal services, e.g. theatre presentations; (iii) outside park personal services, e.g. school presentations.

The goal of interpretation and extension facilities and services is to communicate inspirational, educational and recreational values of parks to the public in order to promote understanding, appreciation and enjoyment of the park experience.

It has been possible to adopt a new classification system because of the flexibility of the new data-processing system. SERD has, therefore, adopted a classification scheme which is not only in keeping with the way in which park facilities and services are administered, but which is also the most useful one for those who make use of the data in the 1976-1977 report. The following diagram illustrates the change in facility and service classification from the

A l'exception des compteurs de circulation, les services aux visiteurs énumérés ci-dessus sont conçus pour offrir aux visiteurs de parc des activités récréatives. Les compteurs de circulation sont utilisés pour observer l'utilisation des diverses aires d'un parc (il ne faut pas les confondre avec les compteurs de circulation installés aux postes d'entrée).

Le rapport statistique 1976-1977 renferme des données sur l'utilisation de trois types d'installations et de services d'interprétation et de diffusion: (i) installations à caractère impersonnel à l'intérieur du parc, par exemple, sentiers signalisés; (ii) services à caractère personnel à l'intérieur du parc, par exemple, présentations dans les théâtres; (iii) services à caractère personnel à l'extérieur du parc, par exemple, présentations dans les écoles.

L'objectif des installations et services d'interprétation et de diffusion est de transmettre aux visiteurs les valeurs philosophiques, éducatives et récréatives des parcs de sorte qu'ils puissent comprendre et apprécier leur expérience et en jouir.

La souplesse du nouveau système de traitement des données a rendu possible l'adoption d'une nouvelle classification. La Division de la recherche socio-économique a donc adopté une classification qui, en plus de correspondre au mode d'administration des installations et services des parcs, est la plus utile pour ceux qui utiliseront les données du rapport 1976-1977. Le figure suivant indique les changements apportés à la classification des installations et

the 1975 to the 1976-1977 report.

#### CLASSIFICATION IN 1975 REPORT

- a. gates
- b. campgrounds
- c. facilities and services  
(excluding campgrounds)

#### CLASSIFICATION IN 1976-1977 REPORT

- a) visitor services
  - i. gates
  - ii. campgrounds
  - iii. other visitor services
- b) interpretation and extension  
facilities and services

It was noted in the 1975 report that the data-processing system, as it then existed, did not allow for organization of the individual facilities and services within the tables by alphabetical order. This problem has been overcome in the 1976-1977 report.

#### 4. Location of Reference Maps

Below is a map of Canada with each of the regions of Parks Canada delineated. Two types of maps are included in Chapter five and serve as a divider between each set of tables for a region: (i) a map of the region, showing the location of National Parks, (ii) a map of Canada indicating the region.

services dans le rapport de 1976-1977, comparativement à celui de 1975.

#### CLASSIFICATION DU RAPPORT DE 1975

- a. postes d'entrée
- b. terrains de camping
- c. installations et services (à l'exclusion des terrains de camping)

#### CLASSIFICATION DU RAPPORT 1976-1977

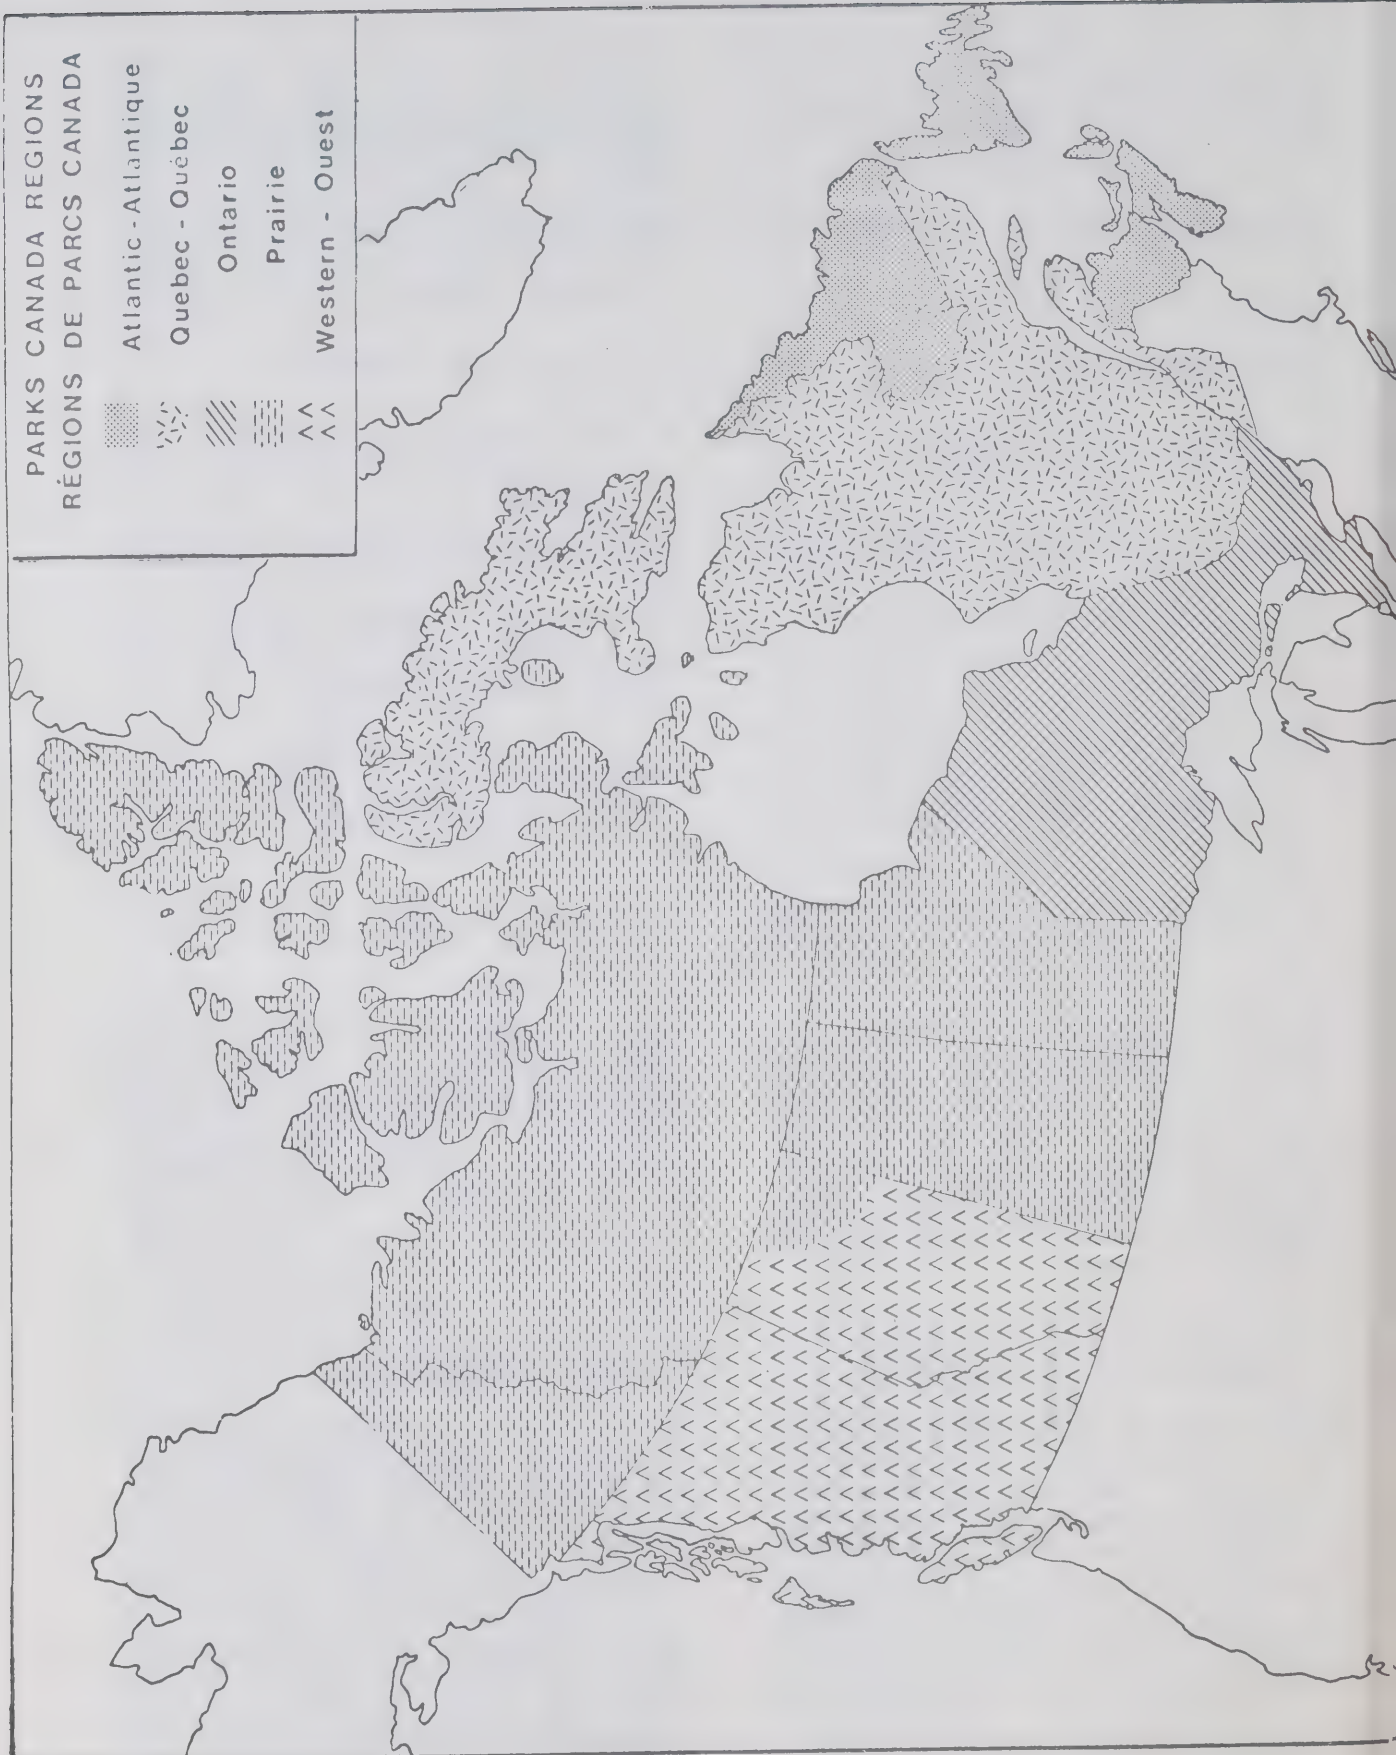

- a) services aux visiteurs
  - i. postes d'entrée
  - ii. terrains de camping
  - iii. autres services aux visiteurs
- b) installations et services d'interprétation et de diffusion

Dans le rapport de 1975, on faisait observer que le système de traitement des données qui existait alors ne permettait pas de présenter par ordre alphabétique dans les tableaux, les installations et services individuels. Ce problème a été résolu dans le rapport 1976-1977.

#### 4. Cartes de référence

On voit ci-après une carte du Canada sur laquelle sont délimitées les régions de Parcs Canada. Le chapitre 5 renferme deux types de cartes, qui servent à diviser chacune des séries de tableaux pour une région: (i) une carte de la Région indiquant l'emplacement des parcs nationaux de cette Région, (ii) une carte du Canada sur laquelle la région en question est indiquée.

FIGURE 1

## C. SERD'S TOTAL INFORMATION SERVICES

Readers should note that the annual statistical report represents only one component of SERD's use statistics and information activities. The Socio-Economic Research Division has been working on the development of a comprehensive and integrated information service which would meet the varied data requirements of groups such as, planners, managers and researchers at all levels in the Program. These other services include: (i) quarterly report on interpretation and extension contacts; (ii) monthly reports; (iii) socio-economic research newsletter - Research News; (iv) reports on use surveys and other socio-economic studies; (v) responses to specific requests for statistical information.

The nature of each of these components is described below.

### 1. Quarterly Report

The only quarterly report published by SERD is the Quarterly Statistical Summary of Interpretation and Extension Contacts. This report, a recent addition to SERD's park-use statistics information service, contains data beginning with the first quarter of the 1976-1977 fiscal year. It is distributed to designated staff in head office, the regions and the field.

## C. SERVICE D'INFORMATION COMPLET - DIVISION DE LA RECHERCHE SOCIO-ECONOMIQUE

Le rapport statistique annuel n'est qu'un élément des activités d'information statistique de la Division de la recherche socio-économique, qui travaille à la mise sur pied d'un service d'information complet et intégré, qui puisse répondre aux besoins diversifiés des planificateurs, des gestionnaires et des agents de recherche à tous les niveaux du Programme. Ces autres services comprennent: (i) le rapport trimestriel sur les contacts d'interprétation et de diffusion; (ii) les rapports mensuels; (iii) le bulletin de recherche socio-économique: Nouvelles sur la recherche; (iv) les rapports d'enquête sur l'utilisation et autres études socio-économiques; (v) les réponses aux demandes particulières d'information statistique.

Chacun de ces éléments est décrit ci-après.

### 1. Le rapport trimestriel

Le seul rapport trimestriel publié par la Division de la recherche socio-économique est l'Abrégé de statistiques trimestrielles des activités d'interprétation et de diffusion. Ce rapport, qui vient de s'ajouter aux services d'information statistique de la Division de la recherche socio-économique, renferme des données pour le premier trimestre de l'année financière 1976-1977. Le document est distribué à certains employés de l'Administration centrale, des bureaux régionaux et des parcs.

Use of interpretation and extension facilities and services is measured in number of contacts.<sup>1</sup> Data are obtained from the Interpretive Contact Statistics - Monthly Report form and are processed manually. The number of contacts for individual types of facilities and services is shown for each month of the quarter. All the contacts for the entire quarter and the cumulative fiscal year are also reported. Subtotals are provided for the following classification of facilities and services: (i) inside park non-personal, (ii) inside park personal, (iii) outside park non-personal, (iv) outside park personal. The data are totalled for each park, for each region and across the whole system.

## 2. Monthly Reports

### a. Attendance Reports

Attendance at the National Parks and National Historic Parks and Sites is a monthly record of the number of visits to selected parks and sites. Park-attendance figures are derived from the data submitted by park staff on the Summary of Traffic and Attendance form (NPC 9). Attendance figures for National Historic Parks and Sites are obtained from data submitted on the Visitor Registration Form (NPC 182). The data are manually processed by SERD staff. The

<sup>1</sup>The unit counted may be number of persons, number of pamphlets taken, etc.

On mesure l'utilisation des installations et services d'interprétation et de diffusion par le nombre de contacts.<sup>1</sup> Ces données sont recueillies au moyen du rapport mensuel: Statistiques d'interprétation, et sont traitées manuellement. Le nombre de contacts pour chaque type d'installation et de service est indiqué pour chaque mois du trimestre. On enregistre également le nombre total de contacts pour le trimestre entier ainsi que le total cumulatif de l'année financière. On donne des sous-totaux pour les classes suivantes d'installations et de services: (i) contacts impersonnels à l'intérieur du parc, (ii) contacts personnels à l'intérieur du parc, (iii) contacts impersonnels à l'extérieur du parc, (iv) contacts personnels à l'extérieur du parc. On additionne enfin les données de chaque parc, de chaque région et de l'ensemble du réseau.

## 2. Les rapports mensuels

### a. Rapports sur la fréquentation

La fréquentation des parcs nationaux et des parcs et lieux historiques nationaux est établie par l'enregistrement du nombre de visites que certains parcs et lieux reçoivent chaque mois. Les chiffres de fréquentation des parcs sont tirés des données enregistrées par le personnel des parcs au moyen du formulaire: Etat de la circulation et de la fréquentation (NPC 9). Dans le cas des parcs et lieux historiques nationaux, les chiffres de fréquentation pro-

<sup>1</sup>Il peut s'agir du nombre de personnes, du nombre de dépliants enlevés, etc.

report is published monthly and distributed to Parks Canada staff in head office, the regions and the field and to selected external agencies.

The following information is provided in the monthly attendance report: (i) attendance figures by park and site for the given month; (ii) attendance figures for the same month in the previous year; (iii) percentage variation between the two monthly figures and, where the variation is 20% or greater, a written reason for the variation; (iv) current fiscal year to date attendance figures; (v) previous fiscal year to date attendance figures; (vi) percentage variation of current year to date attendance figures compared to previous fiscal year to date attendance figures; (vii) for all statistics: regional totals, National Parks total, National Historic Parks and Sites total.

#### b. Campground Report

Use of National Park Campgrounds is another new addition to SERD's park-use statistics information service. The first report was based on campground use data for October 1976. The report is published for each month during which significant use is made of campgrounds. Copies of the report are available to senior managers and, on request, to other staff.

viennent des données du formulaire: Formule d'inscription des visiteurs (NPC 182). Les données sont traitées manuellement par le personnel de la Division de la recherche socio-économique. Le rapport est publié tous les mois et distribué au personnel de Parcs Canada à l'Administration centrale, dans les bureaux régionaux et dans les parcs, de même qu'à certains organismes de l'extérieur.

Le rapport mensuel sur la fréquentation présente les renseignements suivants: (i) les chiffres de fréquentation dans chaque parc et lieu pendant le mois en question; (ii) les chiffres de fréquentation au cours du même mois de l'année précédente; (iii) pourcentage de variation entre les chiffres des deux mois et, lorsque la variation est de 20% et plus, une note indiquant la cause de la variation; (iv) chiffre cumulatif de fréquentation pour l'année financière en cours; (v) chiffre cumulatif de fréquentation pour l'année financière précédente; (vi) pourcentage de variation entre le cumulatif de l'année financière en cours et le cumulatif de l'année financière précédente; (vii) pour tous les chiffres: total - Région; total - parcs nationaux; total - parcs et lieux historiques nationaux.

#### b. Rapport sur l'utilisation des terrains de camping

Le Rapport sur l'utilisation des terrains de camping est un autre nouvel élément du service d'information statistique de la Division de la recherche socio-économique. Le premier rapport était fondé sur les données d'utilisations des terrains de camping pendant le mois d'octobre 1976. On publie un rapport pour chaque mois au cours

duquel on enregistre une utilisation importante. Le rapport est à la disposition des cadres supérieurs ainsi que des autres employés qui en font la demande.

The data for this report, obtained from the NPC 595: Park-Use Record Form (for campgrounds) are stored in a computer which is programmed to produce tables. In the case of regular campgrounds, statistics provided in campground-use tables are: (i) number of campground party-nights<sup>2</sup> for the month reported for each park; (ii) per cent variation between current and previous year's party-night figures; (iii) cumulative number of party-nights since the start of the fiscal year; (iv) percentage variance between current and previous fiscal years cumulative party-nights; (v) number of campsites available in the current month and the same month of the previous year.

For group campgrounds, the statistics provided in the campground-use tables are: (i) number of campground person-nights<sup>3</sup> for the month reported for each park; (ii) per cent variation

Les données de ce rapport, compilées d'après le formulaire NPC 595: Relevé d'utilisation du parc (terrains de camping) sont emmagasinées dans l'ordinateur, qui est programmé pour produire des tableaux. Dans le cas des terrains de camping réguliers, les chiffres fournis aux tableaux sur l'utilisation des terrains de camping portent sur: (i) le nombre de nuits-groupes<sup>2</sup> enregistrées dans le mois en question pour chaque parc; (ii) le pourcentage de variation entre les chiffres de nuits-groupes de l'année courante et de l'année précédente; (iii) le nombre cumulatif de nuits-groupes pour l'année financière en cours; (iv) le pourcentage de variation entre le nombre cumulatif de nuits-groupes de l'année financière courante et de l'année financière précédente; (v) le nombre d'emplacements de camping disponibles dans le mois en question et dans le mois correspondant de l'année précédente.

Dans le cas des terrains de camping collectifs, les chiffres fournis dans les tableaux sur l'utilisation des terrains de camping portent sur: (i) le nombre de nuits-personnes<sup>3</sup> enregistrées dans le

---

<sup>2</sup>a unit of measure defined as one night of campground use by one group of people occupying a campsite.

<sup>3</sup>a unit of measure defined as one night of group campground use by one person.

---

<sup>2</sup>unité de mesure définie comme une nuit d'utilisation d'un terrain de camping par un groupe de personne occupant un même emplacement de camping.

<sup>3</sup>unité de mesure définie comme une nuit d'utilisation d'un terrain de camping collectif par une personne.

between current year and previous year person-night figures; (iii) cumulative number of person-nights since the start of the fiscal year; (iv) percentage variance between current and previous fiscal years cumulative person-nights.

SERD welcomes comments from campground-report users to determine the adequacy of reported data. Statistics are given by park only, but data on individual campgrounds have been programmed into the campground data file. Various types of campground-use information can thus be speedily provided to meet management needs.

### 3. Research News

In August 1976, the first edition of the Socio-Economic Research Division's Research News was distributed within Parks Canada. The major goal of this quarterly newsletter is to disseminate research information throughout the Program. Research News describes socio-economic research being carried out or planned at head office or in the regions, as well as reports on projects launched by provincial governments and other agencies. The newsletter features summaries of completed reports, bibliographies on specific areas of outdoor recreation research, and statistics on trends and projections in park-use. The emphasis is on letting people know

mois en question pour chaque parc; (ii) le pourcentage de variation entre les chiffres de nuits-personnes de l'année courante et de l'année précédente; (iii) le nombre cumulatif de nuits-personnes dans l'année financière en cours; (iv) le pourcentage de variation entre le nombre cumulatif de nuits-personnes pour l'année financière courante et l'année financière précédente.

La Division de la recherche socio-économique recevra avec plaisir les observations des usagers du rapport sur les terrains de camping pour lui permettre de déterminer si les données présentées suffisent. Bien que les statistiques soient présentées par parc seulement, l'ordinateur est programmé pour produire des données sur l'utilisation de chaque terrain de camping. Il est donc possible de fournir divers types de renseignements sur l'utilisation des terrains de camping pour répondre aux besoins administratifs.

### 3. Nouvelles sur la recherche

En août 1976, la Division de la recherche socio-économique distribuait au sein de Parcs Canada le premier numéro du bulletin: Nouvelles sur la recherche. Le principal objectif de ce bulletin trimestriel est de disséminer au sein du Programme, des informations sur la recherche. Les Nouvelles sur la recherche décrivent les travaux de recherche socio-économique effectués ou projetés à l'Administration centrale et dans les Régions et présentent également des rapports sur des projets entrepris par des administrations provinciales et d'autres organismes. On y trouve des résumés de rapport déjà terminés, des bibliographies portant sur des

what is available to help them in their jobs. Research News is currently distributed within head office, to the regions and to the parks and sites, as well as to provincial governments and other selected agencies.

#### 4. Survey Reports

The Socio-Economic Research Division is involved in a wide variety of traffic-pattern surveys, visitor-use surveys and social and economic impact studies. Copies of survey reports are made available to head office and regional staff and, subject to the security classification level of the document, to the public. Sets of survey data are also available for further analysis by others. Many data sets are retained by the Leisure Studies Data Bank at the University of Waterloo for use in university teaching and research. The availability of information on surveys in which SERD is involved is noted in Research News.

#### 5. Response to Specific Requests

The annual, quarterly and monthly statistical reports have been designed to respond to a wide range of needs for park-use data. There will, however, undoubtedly be data needs which are not met within the framework of the regularly published reports. The Socio-

domaines particuliers de la recherche sur les loisirs de plein air ainsi que des informations statistiques sur les tendances et les prévisions de l'utilisation des parcs. On vise surtout à informer le lecteur sur le matériel susceptible de l'aider dans son travail. Les Nouvelles sur la recherche sont distribuées à l'Administration centrale, dans les régions ainsi qu'aux parcs et lieux, aux administrations provinciales ainsi qu'à certains autres organismes.

#### 4. Rapports d'enquête

La Division de la recherche socio-économique mène une vaste gamme d'enquêtes sur la circulation, des enquêtes sur l'utilisation des parcs, ainsi que des études socio-économique. Les rapports d'enquête sont mis à la disposition du personnel de l'Administration centrale et des Régions et ils sont rendus publics sous réserve de la cote de sécurité du document. Des séries de données d'enquête sont également disponibles aux fins d'analyse. Plusieurs séries de données sont utilisées à des fins d'enseignement et de recherche par la Banque de Données sur les Loisirs de l'Université de Waterloo. La disponibilité des renseignements découlant des enquêtes de la Division de la recherche socio-économique est indiquée dans les Nouvelles sur la recherche.

#### 5. Réponses à des demandes particulières

Les rapports statistiques annuels, trimestriels et mensuels sont conçus pour répondre à une vaste gamme de besoins en données sur l'utilisation des parcs. Toutefois, il y a sans aucun doute des besoins en données qui ne sont pas comblés par les rapports

Economic Research Division endeavours to supply data requested by other divisions and regions in Parks Canada and by other agencies. Much of the data are on computer files, so special tables can be produced when necessary. It should be noted that the capability to produce histograms for regularly collected park-use data has been retained, although histograms no longer appear in the annual report. Special requests should be forwarded to:

Chief,  
Socio-Economic Research  
Division,  
Program Co-ordination Branch,  
Parks Canada,  
Centennial Tower,  
400 Laurier Avenue West,  
Ottawa, Ontario.  
K1A 0H4

périodiques. La Division de la recherche socio-économique s'efforce de répondre aux demandes particulières de données qu'elle reçoit d'autres divisions et des régions de Parcs Canada, ou d'autres organismes. Puisque la majorité des données sont dans des fichiers mécanographiques, il est possible de produire des tableaux particuliers, au besoin. Il faut noter qu'il est possible de produire des histogrammes reliés à des données sur l'utilisation des parcs régulièrement recueillies, bien que le rapport annuel ne renferme plus d'histogrammes. Les demandes particulières doivent être adressées au:

Chef  
Division de la recherche  
socio-économique  
Direction de la coordination  
des programmes  
Parcs Canada  
Tour du Centenaire  
400 ouest, avenue Laurier  
Ottawa (Ontario)  
K1A 0H4

Chapter 2  
READING THE TABLES

Chapitre 2  
LECTURE DES TABLEAUX

## CHAPTER 2

## READING THE TABLES

The purpose of this chapter is to assist the reader in understanding the data in Chapter three and Chapter five. While the tables themselves are not difficult to read, an explanation of how they should be interpreted is necessary. Chapter two is a vitally important component of this statistical report and should be consulted whenever the data in Chapters three and five are used.

## A. OVERVIEW TABLES (TABLES 1 - 5)

Five statistical overview tables appear in Chapter three. They provide a fiscal year (April 1 to March 31) summary of regional and national data on: (i) National Park attendance; (ii) National Historic Parks and Sites attendance; (iii) use of regular campgrounds; (iv) use of group campgrounds; (v) use of interpretation and extension facilities and services.

The attendance overview tables provide a national and regional perspective which allows readers to readily note the number of visits which have been recorded at parks and sites. Only current and previous fiscal year data are included. However, those interested in trends over a longer time period should consult Chapter four: TREND STATISTICS.

## CHAPITRE 2

## LECTURE DES TABLEAUX

Ce chapitre vise à faciliter la compréhension des données des chapitres 3 et 5. Bien que les tableaux statistiques ne soient pas difficiles à lire, des explications s'imposent quant à leur interprétation. Le chapitre 2 est un élément essentiel de ce rapport statistique et l'on devrait s'y référer en utilisant les données des chapitres 3 et 5.

## A. TABLEAUX D'ENSEMBLE (TABLEAUX 1 - 5)

Cinq tableaux statistiques d'ensemble apparaissent au chapitre 3. Ils fournissent un résumé statistique régional et national pour l'année financière (1er avril au 31 mars), sur: (i) la fréquentation des parcs nationaux; (ii) la fréquentation des parcs et des lieux historiques nationaux; (iii) l'utilisation des terrains de camping réguliers; (iv) l'utilisation des terrains de camping collectifs; (v) utilisation des installations et services d'interprétation et de diffusion.

Les tableaux d'ensemble sur la fréquentation donnent une perspective nationale et régionale qui permettra au lecteur de connaître rapidement le nombre de visites enregistrées aux parcs et lieux. Ces tableaux ne présentent que les données de l'année financière en cours et de l'année financière précédente, mais ceux qui s'intéressent aux tendances observées dans une période plus étendue peuvent consulter le chapitre 4: LES STATISTIQUES DES TENDANCES.

Campground-overview tables are a summary of the data presented in the individual campground-use table in Chapter five. Readers who find a regional and national summary to be of interest can easily obtain this information from the overview tables.

There are no summary data for other visitor services facilities. This type of summary would not be meaningful given the very wide variety of these facilities and services and the diverse data collection methods used.

#### 1. Attendance overview tables

Table 1 - Attendance at National Parks

Attendance data for National Parks are obtained from the NPC 9: Summary of Traffic and Attendance form. The measure of attendance is number of visits (or visitor entries) into National Parks, usually calculated by applying partition factors to raw traffic counts. It is important to understand that the unit of measure for attendance is number of visits not number of discrete visitors, since one individual may make several visits to a park or site over the course of a fiscal year. Non-visitor entrants, who are defined as persons in a park for business reasons (park staff, concessionaires) and full-time park residents, are not included in attendance figures. Wherever possible, visitor entrants who leave and re-enter the park on the same day are excluded from the visitor count on their second or subsequent re-entry. Those readers

Les tableaux d'ensemble pour les terrains de camping constituent un résumé des données présentées au tableau du chapitre 5 sur l'utilisation des terrains de camping individuels. Les lecteurs qui voudraient un résumé régional et national peuvent obtenir cette information facilement au moyen des tableaux d'ensemble.

Il n'y a pas de résumé de données pour les autres services aux visiteurs. Ce type de résumé ne serait pas utile compte tenu de la vaste gamme d'installations et de services existants et des diverses méthodes de collecte des données utilisées.

#### 1. Tableaux d'ensemble sur la fréquentation

Tableau 1 - Fréquentation des parcs nationaux

Les données sur la fréquentation des parcs nationaux sont tirées du formulaire NPC 9: Etat de la circulation et de la fréquentation. La mesure de la fréquentation est le nombre de visites (ou d'entrées de visiteurs) dans les parcs nationaux, que l'on calcule habituellement en appliquant des facteurs de répartition aux comptes bruts de circulation. Il est important de savoir que l'unité de mesure de la fréquentation est le nombre de visites, et non pas le nombre de visiteurs puisqu'une personne peut effectuer plusieurs visites dans un parc ou un lieu au cours d'une année financière. Les non-visiteurs, c'est-à-dire les personnes qui pénètrent dans un parc pour raison d'affaire (personnel du parc, concessionnaires) ainsi que les résidents permanents du parc, ne sont pas inclus dans les chiffres de fréquentation. Les visiteurs qui

interested in the raw traffic counts at monitored gates should refer to Table 9, where such data are presented by park.

quittent le parc et y reviennent dans la même journée sont, dans la mesure du possible, exclus du dénombrement de visiteurs lors de leurs rentrée. Les lecteurs qui s'intéressent aux comptes bruts de véhicules enregistrés aux postes d'entrée contrôlés doivent consulter le tableau 9, qui présente ces données par parc.

National Park attendance data are presented for each of the five regions along with the total attendance at all National Parks. Two fiscal years of data are provided for comparison, 1975-1976 data and 1976-1977 data, with the percentage difference in attendance figures. A positive percentage difference indicates an increase in attendance from 1975-1976 to 1976-1977; a negative percentage difference indicates a decrease from 1975-1976 to 1976-1977.

On présente des données sur la fréquentation des parcs nationaux pour chacune des cinq régions ainsi que le chiffre total de la fréquentation pour tous les parcs nationaux. Aux fins de comparaison, on fournit les données de deux années financières: les données de 1975-1976 et celles de 1976-1977. On indique également le pourcentage de différence entre les chiffres de fréquentation de l'année 1975-1976 et ceux de 1976-1977. Un pourcentage de différence positif indique une augmentation du nombre de visites de 1975-1976 à 1976-1977; un pourcentage de différence négatif indique une diminution de 1975-1976 à 1976-1977.

Table 2 - Attendance at National Historic Parks and Sites

Attendance at National Historic Parks and Sites is also measured in number of visits. The attendance data are obtained from the NPC 182, Visitor Registration Form. Park staff calculate attendance figures using base data such as electronic counts, hand counts, fee records and registration records.

The table format is identical to that used for attendance at National Parks. Regional and

Tableau 2 - Fréquentation des parcs et des lieux historiques nationaux

La fréquentation des parcs et des lieux historiques nationaux est également mesurée par le nombre de visites. Les données sur la fréquentation sont tirées du formulaire NPC 182, Form le d'inscription des visiteurs. Le personnel des parcs calcule la fréquentation en utilisant des données de base obtenues au moyen des compteurs électroniques, des dénombrements manuels, des dossiers des droits d'entrée ainsi que des registres d'inscription.

La présentation du tableau est identique à celle qui est utilisée pour la fréquentation des parcs

national totals are provided for the 1975-1976 and the 1976-1977 fiscal years and percentage change in attendance from 1975-1976 to 1976-1977 is shown.

## 2. Campground overview tables

Table 3 - Use of Regular Campgrounds

Regular campgrounds have individual campsites, each of which is intended for use by one party. Data on regular campground use are obtained from the NPC 595, Park-Use Record Form (for campgrounds). The unit of measure is the party-night, defined as one night of campsite use by one group of people.

The total number of party-nights recorded at regular campgrounds for each region are presented as well as the total for all regions. Campground-use data are given for the 1975-1976 and 1976-1977 fiscal years along with the percentage change in number of party-nights of use.

Table 4 - Use of Group Campgrounds

Group campgrounds do not have individual campsites since it is intended that they be used by large, organized groups. Given the absence of individual campsites, the party-night is not a useful measure of use for the group campground. The person-night has

nationaux. On fournit les totaux régionaux et nationaux pour l'année financière 1975-1976 et l'année financière 1976-1977 et l'on indique également le pourcentage de différence de la fréquentation entre 1975-1976 et 1976-1977.

## 2. Tableaux d'ensemble pour les terrains de camping

Tableau 3 - Utilisation des terrains de camping réguliers

Les terrains de camping réguliers sont dotés d'emplacements de camping individuels dont chacun doit servir à un groupe. Les données sur l'utilisation des terrains de camping réguliers sont tirées du formulaire NPC 595: Relevé d'utilisation du parc (terrains de camping). L'unité de mesure est la nuit-groupe, définie comme une nuit d'utilisation d'un emplacement de camping par un groupe de personne.

On présente le nombre total de nuits-groupes enregistrées aux terrains de camping réguliers de chaque région et on fournit également le total pour toutes les régions. Les données sur l'utilisation des terrains de camping s'appliquent aux années financières 1975-1976 et 1976-1977. On indique également le pourcentage de différence du nombre de nuits-groupes d'utilisation entre 1975-1976 et 1976-1977.

Tableau 4 - Utilisation des terrains de camping collectifs

Les terrains de camping collectifs ne sont pas dotés d'emplacements de camping individuels puisqu'ils doivent servir à de vastes groupes organisés. Vu l'absence d'emplacements de camping individuels, la nuit-groupe ne constitue pas une bonne mesure d'utilisation pour le

therefore been adopted as the most meaningful unit of measure. A person-night is defined as one night of group campground use by one person. Data on the use of group campgrounds is obtained from the NPC 595: Park-Use Record Form (for campgrounds).

Table 4 is identical in format to Table 3 with the exception that the unit of measure is the person-night rather than the party-night.

Table 5 - Use of Interpretation and Extension Facilities and Services

Interpretation and extension facilities and services are classified into three general groupings: inside park non-personal, inside park personal, outside park personal. The unit of measure is number of contacts, which may be number of visitor exposures to an interpretive display, number of pamphlets taken from an interpretive centre, and so on.

Table 5 presents the number of contacts at each facility type within the three general groups for each region and for all regions (national totals). Sub-totals are provided for the three general groups and a total is given for all interpretation and extension facilities and services by region and across the system.

terrain de camping collectif. On a donc adopté la nuit-personne, que l'on considère dans ce cas comme la meilleure unité de mesure. Une nuit-personne est définie comme une nuit d'utilisation d'un terrain de camping collectif par une personne. Les données sur l'utilisation des terrains de camping collectifs sont tirées du formulaire NPC 595: Relevé d'utilisation du parc (terrains de camping).

La présentation du tableau 4 est identique à celle du tableau 3, sauf que l'unité de mesure est la nuit-personne plutôt que la nuit-groupe.

Tableau 5 - Utilisation des installations et des services d'interprétation et de diffusion

Les installations et services d'interprétation et de diffusion sont classés en trois catégories générales: services impersonnels à l'intérieur du parc, services personnels à l'intérieur du parc, services personnels à l'extérieur du parc. L'unité de mesure est le nombre de contacts, par exemple le nombre de fois qu'un visiteur se trouve en présence d'une exposition d'interprétation, le nombre de dépliants enlevés dans un centre d'interprétation, etc.

Le tableau 5 donne le nombre de contacts pour chaque type d'installation à l'intérieur des trois catégories générales, pour chaque région et pour toutes les régions (totaux nationaux). On fournit des sous-totaux pour les trois catégories générales ainsi qu'un total pour toutes les installations et services d'interprétation et de diffusion, par région et pour l'ensemble du réseau.

Chapter Four, "Trend Statistics"  
(Tables 6-9) - contains data similar to that contained in the overview tables, but over a number of years. The chapter is a self-contained unit with an introduction and with explanations and instructions for the reader preceeding each set of tables.

Le chapitre 4, "Statistiques sur les tendances" (Tableaux 6 à 9) - contient des données semblables à celles présentées dans les tableaux d'ensemble mais elles englobent un certain nombre d'années. Le chapitre constitue une unité complète avec une introduction, des explications et des instructions pour le lecteur au début de chaque ensemble de tableaux.

## B. TABLES FOR VISITOR SERVICES USE-DATA (Tables 9 to 13)

The tables containing data for visitor services appear in Chapter five of this report. Visitor services are subdivided into the following components:

- (i) gates (table 9)
- (ii) regular campgrounds (table 10 and table 11)
- (iii) group campgrounds (table 12)
- (iv) other visitor services (table 13)

An explanation of the tables containing data for each of the above-mentioned components follows.

### 1. Table for gates

Table 9 - Summary of Volume of Traffic Entering National Parks - April 1, 1976 to March 31, 1977

In table 9 are data on the number of vehicle-entries<sup>4</sup> monitored at National Park gates, by individual park. These data are recorded on the NPC 596: Park Use Record Form (for gates). All entering vehicles are recorded, including those containing non-visitors, e.g. park staff, concessionaires, park residents. Also included are repeat entries by one vehicle over the course of a single day.

<sup>4</sup>The two exceptions are St. Lawrence Islands and Auyuittuq National Parks where the unit of measure is number of person entries.

## B. STATISTIQUES SUR L'UTILISATION DES SERVICES AUX VISITEURS (Tableaux 9 à 13)

Les tableaux statistiques pour les services aux visiteurs apparaissent au chapitre 5 du rapport. Les services aux visiteurs se composent des éléments suivants:

- (i) postes d'entrée (tableau 9)
- (ii) terrains de camping réguliers (tableau 10 et tableau 11)
- (iii) terrain de camping collectifs (tableau 12)
- (iv) autres services aux visiteurs (tableau 13)

On trouvera ci-après des notes explicatives touchant les tableaux statistiques pour chacun de ces éléments.

### 1. Tableau pour les postes d'entrée

Tableau 9 - Bilan du nombre total de véhicules entrant dans les parcs nationaux - 1er avril 1976 au 31 mars 1977.

Dans le tableau 9, on trouve des données sur le nombre d'entrées de véhicules<sup>4</sup> observé aux postes d'entrée de chacun des parcs nationaux. Ces données sont consignées au formulaire NPC 596: Relevé d'utilisation du parc (postes d'entrée). Tous les véhicules qui pénètrent dans le parc sont enregistrés, y compris les véhicules qui contiennent des non-visiteurs, par exemple le

<sup>4</sup>Les deux exceptions sont les parcs nationaux des Iles du Saint-Laurent et d'Auyuittuq, où l'unité de mesure est le nombre d'entrées de personnes.

An example of the table follows, accompanied by an explanation of the important features of the table (see Figure 2).

## 2. Campground tables

Table 10 - Summary of National Park Campground Use - April 1, 1976 to March 31, 1977

The summary data in table 10 are taken from the monthly records of the use of regular campgrounds in National Parks. As defined in Section I, a regular campground has individual campsites and the unit of measure is the party-night. The purpose of the table 10 is to show the volume of use of campgrounds. Table 11, by way of contrast, reports on the level of occupancy by showing the relationship between level of use and the number of campsites available for use.

Figure 3 explains the various components of table 10.

Table 11 - National Park Campgrounds Occupancy - April 1, 1976 to March 31, 1977

Table 11 reports on how full a campground has been; i.e. how use levels relate to campground capacity, defined as the number of campsites available for use. Although information on the number

personnel du parc, les concessionnaires, les résidents du parc. Ces chiffres incluent également les entrées subséquentes d'un même véhicule au cours d'une même journée.

Nous donnons ci-après un exemple du tableau, qui s'accompagne d'une explication de ses éléments importants (voir figure 2).

## 2. Tableaux pour les terrains de camping

Tableau 10 - Terrains de camping dans les parcs nationaux: bilan de l'utilisation du 1er avril 1976 au 31 mars 1977

Les données du tableau 10 découlent des relevés mensuels de l'utilisation des terrains de camping réguliers dans les parcs nationaux. Comme l'indique la définition de la section I, un terrain de camping régulier est doté d'emplacements de camping individuels et l'unité de mesure est la nuit-groupe. L'objet du tableau 10 est d'indiquer le volume d'utilisation des terrains de camping. Le tableau 11, par contre, établit le niveau d'occupation en montrant le rapport qui existe entre le niveau d'utilisation et la capacité, c'est-à-dire le nombre d'emplacements de camping pouvant être utilisés.

La figure 3 explique les divers éléments du tableau 10.

Tableau 11 - Terrains de camping dans les parcs nationaux: renseignements sur l'occupation du 1er avril 1976 au 31 mars 1977

Le tableau 11 indique le niveau d'occupation du terrain de camping, c'est-à-dire qu'il établit un rapport entre le niveau d'utilisation et la capacité

of days in each month that a campground was open is not shown in table 11, it can be readily obtained from table 10.

l'utilisation du terrain de camping, soit le nombre d'emplacements de camping pouvant être utilisés. Le tableau 11 n'indique pas le nombre de jours d'ouverture d'un terrain de camping pour chaque mois, mais on peut obtenir ce renseignement rapidement en consultant le tableau 10.

Figure 4 - "Example of table 11", provides the key for reading the data presented.

La figure 4 - "Exemple du tableau 11", est la clé qui permet de déchiffrer les données du tableau.

Table 12 - Summary of National Park Group Campgrounds Use - April 1, 1976 to March 31, 1977

Group campgrounds do not have individual campsites. As explained previously the person-night is the most appropriate unit of measure for reporting the use of group campgrounds. It should be noted that there are no occupancy data for group campgrounds. Group campground use cannot effectively be linked to capacity since this type of campground does not have a fixed capacity determined by the availability of individual campsites.

Tableau 12 - Terrains de camping collectifs dans les parcs nationaux: bilan de l'utilisation du 1er avril 1976 au 31 mars 1977

Les terrains de camping collectifs ne sont pas dotés d'emplacements de camping individuels. Comme l'a déjà expliqué, la nuit-personne est l'unité de mesure la plus appropriée pour faire rapport sur l'utilisation des terrains de camping collectifs. Il faut noter qu'il n'y a pas de données d'occupation pour les terrains de camping collectifs. L'utilisation des terrains de camping collectifs ne peut être reliée à la capacité puisque ce type de terrain de camping n'a pas de capacité fixe déterminée par la disponibilité des emplacements de camping individuels.

Figure 5 - "Example of table 12", describes how the statistics on group campgrounds are to be read.

La figure 5 - "Exemple du tableau 12", explique comment lire les statistiques sur les terrains de camping collectifs.

### 3. Other Visitor Services Table (Table 13)

### 3. Tableau pour autres services aux visiteurs (Tableau 13)

Table 13 - Summary of National Park Facilities/Services Use - April 1, 1976 to March 31, 1977

Tableau 13 - Installations et services offerts par les parcs nationaux: bilan de l'utilisation du 1er avril 1976 au 31 mars 1977

Table 13 contains use data for other visitor services. A list of

Le tableau 13 renferme des données sur l'utilisation des autres

the facilities and services for which use data are reported is included in Chapter one, "Organisation of the Report". It is important to distinguish between other visitor services (e.g. golf courses, pools) and interpretation and extension facilities and services (e.g. roving naturalist, guided walks). Use-data for interpretation and extension facilities and services is contained in table 14.

The unit of measure for use of other visitor services has not been standardized. The unit of measure which is most useful in indicating the amount of loading on the facility or service has been adopted. The units presently in use for other visitor services are persons, parties and vehicles (used for traffic counters only).

Figure 6 presents an example of Table 13 with an explanation of its contents. One important point to note in connection with Table 13 is the absence of park totals for any of the statistics. The varied nature of other visitor services and the diverse data collection methods used make it meaningless for the data to be summed.

services aux visiteurs. La section "Présentation du rapport" du chapitre 1 contient une liste des installations et services pour lesquels on fait rapport de l'utilisation. Il est important de faire la distinction entre les autres services aux visiteurs (terrains de golf, piscines) et les installations et services d'interprétation et de diffusion (naturaliste itinérant, randonnées guidées). Les données sur l'utilisation des installations et services d'interprétation et de diffusion sont présentées au tableau 14.

L'unité de mesure d'utilisation des autres services aux visiteurs n'a pas été normalisée. On a adopté l'unité de mesure la plus utile pour indiquer le volume de charge de l'installation ou du service. Les unités de mesure actuellement utilisées pour les autres services aux visiteurs sont: les personnes, les groupes et les véhicules (pour les compteurs de circulation seulement).

La figure 6 présente un exemple du tableau 13 et une explication de son contenu. Un point important à noter dans le cas du tableau 13 est l'absence d'un total-parc pour toutes les données. Il serait inutile d'additionner les données vu la nature diversifiée des autres services aux visiteurs et les diverses méthodes utilisées pour la collecte des données.

C. INTERPRETATION AND EXTENSION  
FACILITIES AND SERVICES TABLE  
(Table 14)

Table 14 - Summary of National Park Interpretation and Extension Contacts April 1, 1976 to March 31, 1977

Table 14 presents data for interpretation and extension facilities and services on a park by park basis, as well as a regional wrap-up. An explanation of the three types of interpretation and extension facilities and services for which data are reported can be found in Chapter One, "Organisation of the Report".

The unit of measure used in this table is number of contacts, which may be number of visitor exposures to interpretive displays, number of pamphlets taken from an interpretative centre.

Figure 7 presents an example of Table 14 with an explanation of the contents.

C. TABLEAU POUR LES INSTALLATIONS  
ET SERVICES D'INTERPRETATION  
ET DE DIFFUSION (Tableau  
14)

Tableau 14 - Sommaire statistique des contacts d'interprétation et de diffusion dans les parcs nationaux au cours de l'année financière du 1er avril 1976 au 31 mars 1977

Le tableau 14 présente des données pour les installations et services d'interprétation et de diffusion par parc et par région. On trouvera au chapitre 1, "Présentation du rapport", une explication des trois types d'installations et de services d'interprétation et de diffusion pour lesquels on fournit des données.

L'unité de mesure dans ce tableau est le nombre de contacts, par exemple le nombre de fois qu'un visiteur se trouve en présence d'expositions d'interprétation, le nombre de dépliants enlevé dans un centre d'interprétation.

La figure 7 présente un exemple du tableau 14 et une explication de son contenu.

\* WEEKDAYS: MONDAY-THURSDAY INCLUSIVE EXCLUDING PUBLIC HOLIDAYS/SEMAINE: DU LUNDI AU JEUDI INCLUSIVE EXCLUT LES JOURS FERIAES  
\*\* WEEKEND: FRIDAYS, SATURDAYS, SUNDAYS AND PUBLIC HOLIDAYS/SEMAINE: VENDREDI, SAMEDI, DIMANCHE ET JOURS FERIAES  
UNIT OF MEASURE FOR THIS PARK IS PERSONS, NOT VEHICLES/L'UNITE DE MESURE POUR CE PARC EST LE NOMBRE DE PERSONNES, NON LE NOMBRE DE VEHICULES

FIGURE 2  
"EXAMPLE OF TABLE 9"

1. The unit of measure in which gate data are reported is number of vehicle-entries, except for St. Lawrence Islands and Auyuittuq National Parks where the unit of measure is number of person entries.
2. Weekdays are Monday to Thursday inclusive, excluding public holidays. Weekend days are Friday, Saturday, Sunday and public holidays. Weekday and weekend gate data are provided because very different loading patterns may occur on these two types of days. There is generally a larger volume of traffic entering National Park gates on weekend than on weekdays.
3. Only park totals are provided for gate data. The parks appear in alphabetical order.
4. Gate data are provided for the months of the fiscal year (April 1 to March 31) during which a record of the amount of traffic entering the park was maintained.

FIGURE 2  
"L'EXEMPLE DU TABLEAU 9"

1. Le nombre d'entrées de véhicules est l'unité de mesure utilisée pour l'enregistrement des données aux postes d'entrée, sauf pour les parcs des Iles du Saint-Laurent et d'Auyuittuq, où l'unité de mesure est le nombre d'entrées de personnes.
2. La semaine s'étend du lundi au jeudi inclusivement et exclut les jours fériés. Le weekend comprend le vendredi, le samedi, le dimanche ainsi que les jours fériés. On fournit séparément les données de semaine et les données de weekend pour les postes d'entrée parce que les circulations de jours de semaine et des jours de weekend peuvent présenter des grandes différences. En général, le nombre de véhicules qui passent par les postes d'entrée des parcs nationaux est plus considérable pendant le weekend que pendant la semaine.
3. On fournit un total-parc seulement pour les données des postes d'entrée. Les parcs se succèdent par ordre alphabétique.
4. Les données des postes d'entrée portent sur les mois de l'année financière (du 1er avril au 31 mars) au cours desquels on a tenu un registre du nombre de véhicules entrés dans le parc.

FIGURE 3  
"EXAMPLE OF TABLE 10"

1. The park name appears in the upper left-hand corner of the table. Within each region, the parks are ordered alphabetically.
2. The reporting period is the fiscal year. Two fiscal years of data are provided: April 1 1975 to March 31 1976; April 1 1976 to March 31 1977.
3. Number of nights open is the number of nights in the fiscal year during which the campground was open to the public and park staff maintained a record of use. The latter condition is added because there are certain parks, e.g. Fundy, at which winter camping is permitted but park staff are not on hand to record the amount of use.
4. The unit of measure, party-night, is one night of campground use by one group of people occupying a campsite.
5. Percentage change in use is the percentage difference between the number of party-nights recorded during the 1976-1977 fiscal year and the number of party nights recorded during the 1975-1976 fiscal year. A decrease in party-nights from 1975-1976 to 1976-1977 is

FIGURE 3  
"EXEMPLE DU TABLEAU 10"

1. Le nom du parc apparaît au coin supérieur gauche du tableau. A l'intérieur de chaque région, les parcs se succèdent par ordre alphabétique.
2. La période correspondant au rapport est l'année financière. On fournit des données pour deux années financières: du 1er avril 1975 au 31 mars 1976; du 1er avril 1976 au 31 mars 1977.
3. Le nombre de nuits d'ouverture est le nombre de nuits de l'année financière au cours desquelles le terrain de camping était ouvert au public et pour lesquelles le personnel du parc a tenu un registre d'utilisation. Cette dernière condition s'ajoute parce que dans certains parcs où le camping d'hiver est permis, par exemple le parc national de Fundy, le personnel du parc n'est pas disponible pour consigner les données sur l'utilisation.
4. L'unité de mesure, la nuite-groupe, est une nuit d'utilisation d'un terrain de camping par un groupe de personnes occupant un emplacement de camping.
5. Le pourcentage de variation d'utilisation est le pourcentage de différence entre le nombre de nuits-groupes enregistrées au cours de l'année financière 1976-1977 et le nombre de nuits-groupes enregistrées au cours de l'année financière 1975-1976. Une diminution du

indicated by a minus (-) sign. It should be noted that the percentage change in the use of the campground may be influenced by the number of nights open. If, for example, a campground is open for 30 days in May, 1975 but for only 20 days in May 1976, then a decrease in use may reflect the reduced number of nights that the campground was available for use.

nombre de nuits-groupes de 1975-1976 à 1976-1977 est indiquée par le signe moins (-). Il faut noter que le nombre de nuits d'ouverture peut influencer sur le pourcentage de variation d'utilisation du terrain de camping. Si, par exemple, un terrain de camping avait été ouvert pendant 30 jours en mai 1975 mais pendant 20 jours seulement en mai 1976, une diminution de l'utilisation peut alors indiquer une réduction du nombre de nuits au cours desquelles le terrain de camping pouvait être utilisé.

6. Weekdays are Monday to Thursday inclusive, excluding public holidays. Weekend days are Fridays, Saturdays, Sundays and public holidays. Weekday and weekend use figures are provided because very different loading patterns may occur on these two types of days. Use is generally higher on weekend days than on weekdays.

6. La semaine s'étend du lundi au jeudi inclusivement et exclut les jours fériés. Le week-end comprend le vendredi, le samedi, le dimanche ainsi que les jours fériés. On fournit séparément les données de week-end et les données de semaine parce que les circulations de jours de semaine et des jours de week-end peuvent présenter de grandes différences. L'utilisation est généralement plus élevée pendant les jours de week-end.

7. Total is the total percentage change in use, measured in party-nights, from 1975-1976 to 1976-1977. A decrease in party-nights from 1975-1976 to 1976-1977 is indicated by a minus (-) sign.

7. Le total est le pourcentage total de variation d'utilisation, mesuré en nuit-groupes, de 1975-1976 à 1976-1977. Une diminution du nombre de nuits-groupes de 1975-1976 à 1976-1977 est indiquée par le signe moins (-).

8. Ingonish Beach is the name of a regular campground, i.e. one with individual campsites. Within each park, regular campgrounds appear in alphabetical order.

8. Plage Ingonish est le nom d'un terrain de camping régulier, c'est-à-dire un terrain de camping doté d'emplacements de camping individuels. A l'intérieur de chaque parc, les terrains de camping réguliers apparaissent dans l'ordre alphabétique.

9. Campground-use data are provided for the months of the fiscal year (April to March) during which a record of amount of use was maintained by park staff.

10. Statistics for regular campgrounds in each park are totalled with the exception of number of nights open. This statistic is not totalled because it is not possible to sum the number of nights open for all campgrounds.

9. Les données sur l'utilisation des terrains de camping portent sur les mois de l'année financière (d'avril à mars) au cours desquels le personnel du parc a tenu un registre de l'utilisation.

10. Les chiffres s'appliquant aux terrains de camping réguliers de chaque parc sont totalisés à l'exception du nombre de nuits d'ouverture. Ces derniers chiffres ne sont pas totalisés parce qu'il n'est pas possible d'additionner le nombre de nuits d'ouverture pour tous les terrains de camping.

FIGURE 4  
"EXAMPLE OF TABLE 11"

1. The park name appears in the upper left-hand corner of the table. Within each region, the parks are ordered alphabetically.
2. Weekdays are Monday to Thursday inclusive, excluding public holidays. Weekend days are Fridays, Saturdays, Sundays and public holidays. Weekday and weekend use figures are provided because very different loading patterns may occur on these two types of days. Use is generally higher on weekend days than on weekdays.
3. Percentage of campsites occupied is the percentage of the available campsites which were occupied for nights the campground was open to the public.
4. Nights at or over 90% capacity is the number of nights for which 90% or more of the available campsites were occupied.
5. Capacity is the number of campsites available for use.
6. McIntosh Brook is the name of a regular campground, i.e. one with individual campsites. Within each park, regular campgrounds appear in alphabetical order.

FIGURE 4  
"EXEMPLE DU TABLEAU 11"

1. Le nom du parc apparaît au coin supérieur gauche du tableau. A l'intérieur de chaque région, les parcs se succèdent par ordre alphabétique.
2. La semaine s'étend du lundi au jeudi inclusivement et exclut les jours fériés. le weekend comprend le vendredi, le samedi, le dimanche ainsi que les jours fériés. On fournit séparément les données de semaine et les données de week-end parce que les circulations des jours de semaine et des jours de week-end peuvent présenter de grandes différences. En général, l'utilisation est plus élevée pendant les jours de week-end.
3. Le pourcentage d'emplacement de camping occupés est le pourcentage d'emplacements de camping disponibles qui étaient occupés pendant les nuits où le terrain de camping était ouvert au public.
4. Les nuits où l'occupation est de 90% ou plus sont celles où 90% ou plus des emplacements de camping disponibles était occupés.
5. La capacité est le nombre d'emplacements de camping pouvant être utilisés.
6. Ruisseau McIntosh est le nom d'un terrain de camping régulier, c'est-à-dire un terrain de camping doté d'emplacements de camping individuels. Pour chaque parc,

les terrains de camping réguliers apparaissent dans l'ordre alphabétique.

7. Campground-use data are provided for the months of the fiscal year (April to March) during which a record of amount of use was maintained by park staff.

8. A total is provided for the percentage of campsites occupied on a park basis. However, the columns for number of nights at or over 90% capacity, and capacity are not totalled. It is not possible to provide this information on a park basis.

7. Les données sur l'utilisation des terrains de camping portent sur les mois de l'année financière (d'avril à mars) au cours desquels le personnel du parc a tenu un registre de l'utilisation.

8. On fournit un total, par parc, pour le pourcentage d'emplacements de camping occupés. Le nombre de nuits où l'occupation est de 90% ou plus, ainsi que les chiffres de capacité ne sont pas totalisés parce qu'il n'est pas possible de fournir ce renseignement pour chaque parc.

SYMBOLS/SYMBOLS  
C/F: CLOSED/FERME  
N/A: NOT APPLICABLE/SANS OBJET

FIGURE 5  
"EXAMPLE OF TABLE 12"

1. The park name appears in the upper left-hand corner of the table. Within each region, the parks are ordered alphabetically.
2. The reporting period is the fiscal year. Two fiscal years of data are provided: April 1, 1975 to March 31, 1976; April 1, 1976 to March 31, 1977.
3. Number of nights open is the number of nights in the fiscal year during which the campground was open to the public and park staff maintained a record of use. The latter condition is added because there are certain parks, e.g. Fundy, at which winter camping is permitted but park staff are not on hand to record the amount of use.
4. The unit of measure, person-night, is one night of group campground use by one person.
5. The difference between the number of person-nights recorded in 1975-1976 and the number of person-nights recorded in 1976-1977 is expressed as a number (DIFFERENCE) and as a percentage (% CHANGE).

A decrease in person-nights from 1975-1976 to 1976-1977 is indicated by a minus (-) sign.

FIGURE 5  
"EXEMPLE DU TABLEAU 12"

1. Le nom du parc apparaît au coin supérieur gauche du tableau. A l'intérieur de chaque région, les parcs se succèdent par ordre alphabétique.
2. La période pour laquelle on fait rapport est l'année financière. On fournit des données pour deux années financières: du 1er avril 1975 au 31 mars 1976; du 1er avril 1976 au 31 mars 1977.
3. Le nombre de nuits d'ouverture est le nombre de nuits de l'année financière au cours desquelles le terrain de camping était ouvert au public et pour lesquelles le personnel du parc a tenu un registre d'utilisation. Cette dernière condition s'ajoute parce que dans certains parcs, par exemple le parc national de Fundy, où le camping d'hiver est permis, le personnel du parc n'est pas disponible pour consigner les données sur l'utilisation.
4. L'unité de mesure, la nuît-personne, est une nuit d'utilisation d'un terrain de camping collectif par une personne.
5. La différence entre le nombre de nuits-personnes enregistrées en 1975-1976 et le nombre de nuits-personnes enregistrées en 1976-1977 est exprimée en chiffre (DIFFERENCE) et en pourcentage (% CHANGEMENT).

Une diminution du nombre de nuits-personnes de 1975-1976 à 1976-1977 est indiquée par le signe moins (-).

6. Southwest Arm Group is the name of a group campground, i.e. one in which there are no individual campsites. Within each park, the group campgrounds appear in alphabetical order.
7. Campground use data are provided for the months of the fiscal year (April to March) during which a record of amount of use was maintained by park staff.
8. Statistics for group campgrounds in each park are totalled with the exception of number of nights open. This statistic is not totalled because it is not possible to sum the number of nights open for all campgrounds.
6. Southwest Arm - Camping Collectif est le nom d'un terrain de camping collectif, c'est-à-dire un terrain de camping où il n'y a pas d'emplacements de camping individuels. Pour chaque parc, les terrains de camping collectifs apparaissent dans l'ordre alphabétique.
7. Les données sur l'utilisation des terrains de camping portent sur les mois de l'année financière (d'avril à mars) au cours desquels le personnel du parc a tenu un registre d'utilisation.
8. Les chiffres s'appliquant aux terrains de camping collectifs de chaque parc sont additionnées à l'exception du nombre de nuits d'ouverture. Ces derniers chiffres ne sont pas totalisés parce qu'il n'est pas possible d'additionner le nombre de nuits d'ouverture pour tous les terrains de camping.

FIGURE 6  
"EXAMPLE OF TABLE 13"

The park name appears in the upper left-hand corner of the table. Within each region, the parks are ordered alphabetically.

The reporting period is the fiscal year. Two fiscal years of data are provided: April 1, 1975 to March 31, 1976; April 1, 1976 to March 31, 1977.

Number of days in operation is the number of days in the fiscal year during which the facility or service was open to the public.

The amount of use which the facility or service receives is measured in number of persons, parties or vehicles (the unit of measure is specified in the last column of the table).

The difference between the number of persons/parties/vehicles recorded in 1975-1976 and the number of persons/parties/vehicles recorded in 1976-1977 is expressed as a number (DIFFERENCE) and as a percentage (% CHANGE). A decrease in persons/parties/vehicles from 1975-1976 to 1976-1977 is indicated by a minus (-) sign.

The unit of measure in which use is reported is persons, parties or vehicles, depending

FIGURE 6  
"EXEMPLE DU TABLEAU 13"

1. Le nom du parc apparaît au coin supérieur gauche du tableau. A l'intérieur de chaque région, les parcs se succèdent par ordre alphabétique.
2. La période pour laquelle on fait rapport est l'année financière. On fournit des données pour deux années financières: du 1er avril 1975 au 31 mars 1976; du 1er avril 1976 au 31 mars 1977.
3. Le nombre de jours d'ouverture est le nombre de jours de l'année financière au cours desquels l'installation ou service était ouvert au public.
4. Le volume d'utilisation que subit l'installation ou le service est mesuré en nombre de personnes, de groupes ou de véhicules (l'unité de mesure est indiquée dans la dernière colonne du tableau).
5. La différence entre le nombre de personnes/groupes/véhicules enregistrés en 1975-1976 et le nombre de personnes/groupes/véhicules enregistrés en 1976-1977 est exprimée en chiffre (DIFFERENCE) et en pourcentage (% CHANGEMENT). Une diminution du nombre de personnes/groupes/véhicules de 1975-1976 à 1976-1977 est indiquée par le signe moins (-).
6. L'unité de mesure servant à faire rapport de l'utilisation est le nombre de personnes,

on which unit is the most appropriate for reporting use of a particular facility or service.

7. Ingonish Beach Information Centre is the name of a visitor services facility for which use-data are required. Within each park, the facilities and services appear in alphabetical order.

8. Other visitor services use-data are provided for the months of the fiscal year (April to March) during which the facility or service was open to the public.

groupes ou véhicules, c'est-à-dire l'unité que l'on considère la plus appropriée pour faire rapport sur l'utilisation d'une installation ou d'un service particulier.

7. Centre de renseignements de la Plage Ingonish est le nom d'une installation de services aux visiteurs pour laquelle on a besoin de données sur l'utilisation. Pour chaque parc, les installations et services apparaissent dans l'ordre alphabétique.

8. Les données sur l'utilisation des autres services aux visiteurs sont fournies pour les mois de l'année financière (d'avril à mars) au cours desquels l'installation ou service était ouvert au public.

|   | TOTAL.....   |   |           |   |            |

\*VARIATION IN THE NUMBER OF CONTACTS

Many facilities and services reported for the first time this year (76-77) even though they have existed for some time. it is therefore misleading to make year

\*VARIATION DU NOMBRE DE CONTACTS

Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que ces installations

FIGURE 7  
"EXAMPLE OF TABLE 14"

1. The park name appears in the upper left-hand corner of the table. Within each region, the parks are ordered alphabetically.
2. There are two classes of location for facilities and services: (i) inside park and (ii) outside park. There are two types of facilities and services: (i) personal, (ii) non-personal.
3. Individual classes of facilities and services are grouped by location and type.
4. Number of contacts are provided for the period April 1, 1975 to March 31, 1976. Data are missing for those facilities and services which did not report use data for the 1975-1976 fiscal year.
5. Number of contacts are provided for the period April 1, 1976 to March 31, 1977.
6. Variation in the number of contacts cannot be supplied because many facilities and services are reporting for the first time in 1976-1977 although they have existed for some time.
7. Sub-totals are provided for each group of facilities and services classed by location and type.

FIGURE 7  
"EXEMPLE DU TABLEAU 14"

1. Le nom du parc apparaît au coin supérieur gauche du tableau. Pour chaque région, les parcs se succèdent par ordre alphabétique.
2. Les installations et services se divisent en deux classes d'emplacement: (i) à l'intérieur du parc et (ii) à l'extérieur du parc. Il y a deux types d'installations et de services: (i) personnels, (ii) impersonnels.
3. Les classes d'installations et de services sont groupées par emplacement et par type.
4. Le nombre de contacts portent sur la période allant du 1er avril 1975 au 31 mars 1976. Il n'y a pas de données dans le cas des installations et services pour lesquels on n'a pas fait rapport de l'utilisation pour l'année financière 1975-1976.
5. Le nombre de contacts porte sur la période allant du 1er avril 1976 au 31 mars 1977.
6. Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs de ces installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que les installations et services existaient déjà depuis un certain temps.
7. On fournit des sous-totaux pour chaque groupe d'installations et de services classées par emplacement et par type.

Chapter 4  
TREND STATISTICS

Chapitre 4  
LES STATISTIQUES  
DES TENDANCES

## CHAPTER 4

## TREND STATISTICS

A. THE ROLE OF PROJECTIONS AND  
ANALYSIS SECTION

The Projections and Analysis Section is mainly concerned with forecasting and futures research as it applies to outdoor recreation in general and to Parks Canada particularly. Specifically, the intent of forecasting and futures research projects is:

1. to draw projections related to the expected volume of users and the kinds of use of parks, sites and recreational facilities and services;
2. to examine the implications of trends of participation in activities and behavior patterns for policy and planning purposes;
3. to research areas of interest which have an impact on outdoor recreation such as future energy consumption and availability, changing modes of transport, leisure time and recreational technology.

## CHAPITRE 4

## LES STATISTIQUES DES TENDANCES

A. RÔLE DE LA SECTION DE  
PRÉVISIONS ET DE L'ANALYSE

La Section de Prévision et de l'Analyse s'intéresse surtout à la prévision et à la recherche à terme dans le domaine des loisirs de plein air en général et plus particulièrement à ce qui s'applique à Parcs Canada. Les projets de prévisions et de recherches à terme ont pour buts spécifiques:

1. de prévoir le nombre d'usagers et les types d'utilisation des parcs, des lieux historiques, des installations et services récréatifs;
2. d'étudier les répercussions des tendances de la participation du point de vue des systèmes d'activités et de comportement aux fins d'orientation et de planification;
3. de faire de la recherche dans les domaines qui ont un impact sur les loisirs de plein air tels que la consommation et la disponibilité futures d'énergie, les modes de transport en voie de modification, le temps libre et la technologie de récréation.

## B. TRENDS IN CAMPGROUND USE

This summary of campground-use statistics since 1968 has been compiled from the following sources:

- a. Campground Reports 1968-1970;
- b. Statistical References 1971 and 1972;
- c. 1973 to 1976 campground-use printouts.

Only statistics on regular campground use are given in this summary; statistics on group, wilderness and overflow campgrounds have been omitted.

Use is reported in party-nights; i.e. in number of parties staying overnight in campsites in park campgrounds.

Figures are given for seasonal use, i.e. from April 1 to October 31, and for peak-months use, i.e. for July and August.

Overview tables and graphs present the trends at the regional and national levels.

A detailed table presents the trends for each National Park.

Similar statistics for each individual campground are available on request from SERD.

## B. TENDANCES DE L'UTILISATION DES TERRAINS DE CAMPING

Le présent sommaire des statistiques sur l'utilisation des terrains de camping depuis 1968 a été établi à partir des sources suivantes:

- a. Rapport sur les terrains de camping 1968-1970;
- b. Rapports statistiques 1971 et 1972;
- c. Imprimés d'ordinateur de 1973 à 1976 sur l'utilisation des terrains de camping.

Il n'y a que les statistiques sur l'utilisation des terrains de camping ordinaires qui soient représentées dans ce sommaire; les statistiques sur les terrains de camping de groupe, sauvages et supplémentaires ont été omises.

L'utilisation est rapportée en nuits-groupe, c'est-à-dire en nombre de groupes qui passent la nuit sur les emplacements des terrains de camping d'un parc.

Les chiffres donnés ne portent que sur l'utilisation saisonnière, c'est-à-dire du 1<sup>er</sup> avril au 31 octobre, et sur l'utilisation durant les mois de pointe en juillet et août.

Des tableaux et graphiques présentent une vue d'ensemble des tendances aux échellons régionaux et nationaux.

Un tableau détaillé présente les tendances pour chaque parc national.

Des statistiques semblables pour chaque terrain de camping seront mises à la disposition de ceux qui en feront la demande à la DRSE.

### C. TRENDS IN NATIONAL PARKS ATTENDANCE

---

The following graphs and tables show National Park attendance data for the fiscal years 1950-1951 to 1976-1977 inclusive. The overview table and graphs show trends in attendance for all national parks and for each region. The detailed tables present the historical time series for each park. The percentage change over previous year is given in the overview table for the whole National Parks System. These data were derived from the NPC 9, Summary of Traffic and Attendance Form. It should be noted that some of these figures have been revised to correct for errors which have occurred in past reports. Therefore, the data will not always correspond with figures presented in the Monthly Attendance Reports.

### C. TENDANCES DE LA FREQUENTATION DES PARCS NATIONAUX

---

Les graphiques et les tableaux qui suivent présentent des données sur la fréquentation des parcs nationaux pour les exercices financiers allant de 1950-1951 à 1976-1977 inclusivement. Ils donnent une vue d'ensemble des tendances de la fréquentation dans tous les parcs nationaux et pour chaque région. Un tableau détaillé présente les séries chronologiques pour chaque parc. Le tableau d'ensemble présente également des données sur la variation de l'utilisation par rapport à l'année précédente pour tout le réseau des parcs nationaux. Ces données ont été établies à partir de la NPC 9, Etat de la Circulation et de la Fréquentation. Certains chiffres ont été révisés pour corriger les erreurs relevées dans les précédents rapports. Aussi, les données ne correspondront pas toujours aux chiffres contenus dans les rapports mensuels de fréquentation.

D. TRENDS IN NATIONAL HISTORIC  
PARKS AND MAJOR HISTORIC SITES  
ATTENDANCE

The following graphs and tables summarize attendance at National Historic Parks and Major Historic Sites for the fiscal years 1950-1951 to 1976-1977 inclusive. The source of these data is the NPC 182, Visitor Registration Form. Some of these figures have been revised and the data will not always correspond with figures presented in the Monthly Attendance Reports.

D. TENDANCES DE LA FRÉQUENTATION  
DES PARCS ET PRINCIPAUX LIEUX  
HISTORIQUES NATIONAUX

Les graphiques et les tableaux qui suivent résument la fréquentation des parcs et principaux lieux historiques nationaux pour les exercices financiers allant de 1950-1951 à 1976-1977 inclusivement. Ces données ont été établies à partir de la NPC 182 Formule d'inscription des visiteurs. Certains de ces chiffres ont été révisés et les données ne correspondront pas toujours aux chiffres contenus dans les Rapports mensuels de fréquentation.

\*VARIATION IN THE NUMBER OF CONTACTS

Many facilities and services reported for the first time this year (76-77) even though they have existed for some time. It is therefore misleading to make year to year comparisons.

\*VARIATION DU NOMBRE DE CONTACTS

Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que ces installations et services existaient déjà depuis un certain temps.

\*VARIATION IN THE NUMBER OF CONTACTS

Many facilities and services reported for the first time this year (76-77) even though they have existed for some time. It is therefore misleading to make year to year comparisons.

\*VARIATION DU NOMBRE DE CONTACTS

Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que ces installations et services existaient déjà depuis un certain temps.

\*VARIATION IN THE NUMBER OF CONTACTS

Many facilities and services reported for the first time this year (76-77) even though they have existed for some time. It is therefore misleading to make year to year comparisons.

\*VARIATION DU NOMBRE DE CONTACTS

Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que ces installations et services existaient déjà depuis un certain temps.

\*VARIATION IN THE NUMBER OF CONTACTS

Many facilities and services reported  
for the first time this year (76-77) even  
though they have existed for some time.

\*VARIATION DU NOMBRE DE CONTACTS

Il n'est pas possible de fournir des statistiques de  
variation du nombre de contacts parce que plusieurs  
installations et services ont été nouveaux.

Sommaire statistique des contacts d'interprétation et de diffusion dans les parcs nationaux pendant l'année financière  
1er avril 1976 au 31 mars 1977

\*VARIATION IN THE NUMBER OF CONTACTS

Many facilities and services reported for the first time this year (76-77) even though they have existed for some time. It is therefore misleading to make year to year comparisons.

\*VARIATION DU NOMBRE DE CONTACTS

Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que ces installations et services existaient déjà depuis un certain temps.

\*VARIATION IN THE NUMBER OF CONTACTS

Many facilities and services reported for the first time this year (76-77) even though they have existed for some time. It is therefore misleading to make year to year comparisons.

\*VARIATION DU NOMBRE DE CONTACTS

Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que ces installations et services existaient déjà depuis un certain temps.

\*VARIATION IN THE NUMBER OF CONTACTS

Many facilities and services reported for the first time this year (76-77) even though they have existed for some time. It is therefore misleading to make year to year comparisons.

\*VARIATION DU NOMBRE DE CONTACTS

Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que ces installations et services existaient déjà depuis un certain temps.

**\*VARIATION IN THE NUMBER OF CONTACTS**

Many facilities and services reported for the first time this year (76-77) even though they have existed for some time. It is therefore misleading to make year to year comparisons.

**\*VARIATION DU NOMBRE DE CONTACTS**

Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que ces installations et services existaient déjà depuis un certain temps.

\*VARIATION IN THE NUMBER OF CONTACTS

Many facilities and services reported for the first time this year (76-77) even though they have existed for some time. It is therefore misleading to make year to year comparisons.

\*VARIATION DU NOMBRE DE CONTACTS

Il n'est pas possible de fournir des statistiques de variation du nombre de contacts parce que plusieurs installations et services ont fait rapport de l'utilisation pour la première fois en 1976-1977 bien que ces installations et services existaient déjà depuis un certain temps.
